

# Hitler: He Really Didn't Do It

Marcia R. Pinheiro

---

## **Abstract:**

*In this paper, we prove that Hitler was a person of good principles, who cared about his society to best and he had his life usurped by the satanic, so that the Hitler that ran the holocaust was not the original Hitler and therefore it is wrong associating his ID or name to such an absurd and demonic event. We also prove that God Himself doesn't destroy His people: He uses the devil and his creatures for that sort of task instead.*

**Keywords:** devil, god, Hitler, holocaust, punishment

## **I. Introduction**

The entire name of Hitler was Adolf Hitler [1] and he was into arts [2]: "His dream was to study art, as he possessed some artistic talent." A person who has the soul for arts couldn't possibly do what is so far written down in History as his most remarkable doings, namely starting a racist ideology and running the holocaust.

The actual/original Hitler was into helping his fellow citizens in what comes to labor relationships instead: "The Nazi Party was founded as the German Workers' Party by Anton Drexler, a Munich locksmith, in 1919. Hitler attended one of its meetings that year, and before long his energy and oratorical skills would enable him to take over the party, which was renamed National Socialist German Workers' Party in 1920." [3]

We aim at proving that the satanic are the ones who renamed the Nazi Party, so who changed its name from German Workers' Party to National Socialist German Workers' Party and therefore introduced the 25-point program, which is the one talking about illegal expansion of Germany and racism, which was mostly directed to Jews [3]. In practice, we are then proving that the life of Hitler was usurped [4] at most in 1920, which means Adolf Hitler is not to be blamed for the holocaust, but the usurper and the people who made him usurp, so the satanic, and therefore a name that, so far, remains unknown.

## **Development**

Usurpation is a tool of domination, brainwashing and control of the masses for those following the Satanic System, which would be a system created by satan to help his master, the devil, achieve his objectives on earth. It also serves the purpose of supporting the rhetoric of the devil and his own, so basically the purpose of 'making them be right' in what they say (there is only one rational/logical way of doing things, and that is God's way, so that the rhetoric of the devil or of his creatures, such a satan, should always be easily proven to contain fallacies, and they then need tools such as this to make the wrong be perceived as right, the most irrational things be understood as top rationality, this because, in the end, the vast majority of the human race, as for those who are mentally fit, wants to do what is the most logical thing).

They seem to all follow the instructions of a book, since it shouldn't be natural for humans to think of usurping the life of others and, worse, following the satanic system (which seems to be a mandatory thing if people usurp), which, among others, includes scrambles, bisexuality, promiscuity, being bugged in the head (since at most 1900s) and betrayal in marriage): most of us seem to naturally have a feeling of ownership of our identity, to naturally feel that family means something, gives information about who we are somehow, to naturally wish for raising our own kids, to naturally wish for having true love in our lives, therefore not betraying or being betrayed in marriage and so on.

It seems that all the top people in command of the satanic groups managing usurpation in human kind for now at least 137 years have been approached by someone else when they were in jail or mental hospitals, therefore in desperate situations (only desperate because God is not in them), which means none of them ever had the idea on their own, so that the idea is definitely not natural, not even for those who are desperate. Following the thread our investigations formed, we went as far as the Canaanites that existed before the creation of the Jewish 'holy' book, therefore those before 1500 BCE [5].

Hitler before 1920:

[6]

Hitler in 1938:

[7]

We can safely say that whoever Hitler may be in the first picture, he certainly has nothing in common with the person to the right of the second picture (please use a magnifying glass to see the first picture properly and then notice that the nose is very different), and that should be Hitler in 1938.

## II. Conclusions

It is then proven that Adolf Hitler was a serious person, worried about his society and improving its relationship with those that serve it. Who ran the holocaust is a satanic person, a person who, more than likely, killed the original Hitler, even though nowadays usurpation is also through Al Qaeda and therefore the usurper does not necessarily kill the usurped.

We then actually don't have the name of the person who radically changed the face of the Nazi Party, from a labor party, worried about the people of Germany and those who serve them to best that they could, to a fascist party, who later on would run the holocaust, yet that was definitely not Adolf Hitler.

The usurper would have introduced the 25-point program and racism into the Nazi Party. Adolf Hitler suffered more than one usurpation, so that someone else needs to collect all pictures we have of him, together with their respective dates, and compare to count usurpations and determine exactly who is responsible for the holocaust.
