Contents:

1. Differentiation of Scalar and Tensor Functions of Tensor Argument
   Anatoli A. Rogovoy
   01-20

2. A Study of Distortion Theorem and Inclusion Relations for a new class of Meromorphic Functions
   Mr. Vidyadhar Sharma, Dr. Nisha Mathur
   21-27

3. Comparative Study of Pearson’s Chi-Square and Some Ordinal Contingency Tables Models
   Bushirat T. Bolarinwa
   28-32

4. Controllability Result for Nonlinear Integrodifferential Equation
   Eli Innocent Cleopas and Godspower C. Abanum
   33-41

5. Stability Analysis of A General SEIR Epidemic Model with Homogenous Transmission Function and Treatment Rate
   Priya Baghel, Shivram Sharma, V.H. Badshah, T.K. Jhala
   42-49

6. MHD Nanofluid Bioconvection Due To Gyrotactic Microorganisms Past A Convectively Heated Vertical Plate
   Chebii Agnes Jeptoo
   50-71

7. On the Approximation of Quadratic Objective functions in Unconstrained Nonlinear Optimization Programs
   P. N. Assi, E. O. Effanga
   72-80

   ZhuZhang, Wenyuan Sun
   81-84

9. Controllability Result for Nonlinear Integrodifferential Equation
   Eli Innocent Cleopas and Godspower C. Abanum
   33-41

10. Stability Analysis of A General SEIR Epidemic Model with Homogenous Transmission Function and Treatment Rate
    Priya Baghel, Shivram Sharma, V.H. Badshah, T.K. Jhala
    42-49

11. MHD Nanofluid Bioconvection Due To Gyrotactic Microorganisms Past A Convectively Heated Vertical Plate
    Chebii Agnes Jeptoo
    50-71

12. On the Approximation of Quadratic Objective functions in Unconstrained Nonlinear Optimization Programs
    P. N. Assi, E. O. Effanga
    72-80

    ZhuZhang, Wenyuan Sun
    81-84
