

**Contents :**

Analysis Surface Fatigue Fracture On The Material Steel Astm A - 36	01-08
Wind Power Water Pump	09-12
Design And Stress Analysis Of An Iron Board	13-15
A Computational Study On Structural And Thermal Behaviour Of Disc Brake Rotors With Varying Design And Material	16-21
AI driven Optimization Techniques for Tire Pollution Mitigation in EVs: A Conceptual Framework	22-27
A Comparative Study Of Self-Compacted Lightweight Concrete Developed By Utilizing Local And Artificial Lightweight Aggregates	28-34
Advancement In Drone Technology Integrated With Artificial Intelligence And Lidar Sensor	35-41
Study The Mechanical Behavior Of Corrugated Box Using The Finite Element Method	42-48
Development Of MI Model For Rotating Machinery	49-53
Current Status Of Research On Cleaning And Homogenising Devices For Longitudinal Flow Combine Harvesters	54-58
Wear And Friction Behaviour Of Tial Mmc With Sic Reinforcement	59-62
Innovative Solutions for Bridge Construction: The Role of Closure Pour and Diaphragms in Accelerated Bridge Construction (ABC)	63-68
