

Contents :

Geotechnical Characterization Of Borrow Materials For Unpaved Roads In Niger: Case Studies From The Tahoua And Agadez Regions	01-07
Sustainable Development Of Concrete By Partial Replacement Of Coarse Aggregate With E-Waste	08-11
Design, Synthesis, And Electrochemical Performance Of Graphene-Based Nanocomposites For High-Efficiency Energy Storage Applications	12-16
Effect Of Mechanical Properties And Microstructural Analysis Of Below The Knee Prosthetic Leg Socket Developed From Woven Banana Fibre (WBF)	17-24
To Utilize Pump Head For Linear Distribution Of Fluid	00-25
Taxi Operations, Ride-Pooling Markets, And Decentralized Sharing: A Unified Review Of Supply Demand Modelling, Market Equilibrium, And Cost Sharing Mechanisms In Urban Mobility	26-38
Evaluation Of The Chronicle Of Modern Astro Physics About The Final Destiny Of Universe	39-69
Sustainable Treatment Of Automobile Wash Wastewater Using Electrocoagulation Integrated With Waste-Derived Fly Ash Cenosphere Electrode Material	70-75
Exploring Geopolymer Concrete In Archiving A Sustainable, Low Carbon Construction	76-81
Integrating Low-Carbon And Sustainable Materials In Archiving Net-Zero Carbon Building Design	82-84
