

Nobel Prize Physics 2013 (“for the theoretical discovery of a mechanism that contributes to our understanding of the origin of mass of subatomic particles”) is on Illusion. Origin of Mass is by Virtue of Mass Property of two B.B.Bs, Which is Triggered by Divine Mechanics (Oscillation Property of Fermions and Bosons)

Dr V M Das

Abstract: *A hitherto unexplained broken symmetry of the same kind lies behind the very origin of the cosmos in the Big Bang some 14 billion years ago. If equal amounts of matter and antimatter were created, they ought to have annihilated each other. But this did not happen, there was a tiny deviation of one extra particle of matter for every 10 billion antimatter particles. It is this broken symmetry that seems to have caused our cosmos to survive. The question of how this exactly happened still remains unanswered. Perhaps the new particle accelerator LHC at CERN in Geneva will unravel some of the mysteries that continue to puzzle us. [1] The subatomic particle (neutrinos and Higgs) are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry . So the broken symmetry is never spontaneous. It is being misunderstood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize. Big Bang model of origin of the universe is discarded as this model could not reveal nature of dark matter and dark energy of the universe. It is creation physics (Hoyle –Narlikar Universe) that reveals nature of DM and DE first. Our universe is closed universe (Euclid geometry) and it is bounded by cold dark matter layer (CDM) expanding with velocity of light. They found a new particle with a mass of about 125 GeV/c² (about 133 proton masses, on the order of 10⁻²⁵ kg), which is "consistent with the Higgs boson." When protons collide, **they created Massive Higgs bosons**. These are positive oscillation Higgs particle (BE-4) . These **Higgs boson** (positive oscillation) (125 GeV/c²) **are not fundamental particles**. Higgs boson found in LHC is a very massive particle and also decays almost immediately*

I. Introduction

1.1 Press Release 8 October 2013

The Royal Swedish Academy of Sciences has decided to award the Nobel Prize in Physics for 2013 to **François Englert**

Université Libre de Bruxelles, Brussels, Belgium and

Peter W. Higgs

University of Edinburgh, UK

“for the theoretical discovery of a mechanism that contributes to our understanding of the origin of mass of subatomic particles, and which recently was confirmed through the discovery of the predicted fundamental particle, by the ATLAS and CMS experiments at CERN’s Large Hadron Collider”

Here, at last! François Englert and Peter W. Higgs are jointly awarded the Nobel Prize in Physics 2013 for the theory of how particles acquire mass. In 1964, they proposed the theory independently of each other (Englert together with his now deceased colleague Robert Brout). In 2012, their ideas were confirmed by the discovery of a so called Higgs particle at the CERN laboratory outside Geneva in Switzerland.. The awarded theory is a central part of the Standard Model of particle physics that describes how the world is constructed. According to the Standard Model, everything, from flowers and people to stars and planets, consists of just a few building blocks: matter particles. These particles are governed by forces mediated by force particles that make sure everything works as it should. The entire Standard Model also rests on the existence of a special kind of particle: the Higgs particle. This particle originates from an invisible field that fills up all space. Even when the universe seems empty this field is there. Without it, we would not exist, because it is from contact with the

field that particles acquire mass. The theory proposed by Englert and Higgs describes this process. On 4 July 2012, at the CERN laboratory for particle physics, the theory was confirmed by the discovery of a Higgs particle. CERN's particle collider, LHC (Large Hadron Collider), is probably the largest and the most complex machine ever constructed by humans. Two research groups of some 3,000 scientists each, ATLAS and CMS, managed to extract the Higgs particle from billions of particle collisions in the LHC. Even though it is a great achievement to have found the Higgs particle—the missing piece in the Standard Model puzzle—the Standard Model is not the final piece in the cosmic puzzle. One of the reasons for this is that the Standard Model treats certain particles, neutrinos, as being virtually massless, whereas recent studies show that they actually do have mass. Another reason is that the model only describes visible matter, which only accounts for one fifth of all matter in the cosmos. To find the mysterious dark matter is one of the objectives as scientists continue the chase of unknown particles at CERN.

HIGGS BOSONS ARE NOT FUNDAMENTAL PARTICLE. Higgs boson found is a very massive particle and also decays almost immediately

On 4 July 2012, the two main experiments at the LHC (ATLAS and CMS) both reported independently that they found a new particle with a mass of about 125 GeV/c² (about 133 proton masses, on the order of 10⁻²⁵ kg), which is "consistent with the Higgs boson." Although it has several properties similar to the predicted "simplest" Higgs,^[20] they acknowledged that further work would be needed to conclude that it is indeed the Higgs boson, and exactly which version of the Standard Model Higgs it best supported if confirmed.^{[21][22][23][24][25]}

Higg's Bosons found in LHC are not Fundamental particles. Higgs boson found is a very massive particle and also decays almost immediately.

Incomplete Standard Model Chart (SMC). Fly has Mind and Mind is absent in SMC [1]

Elementary particles			Higgs?	Forces		Messenger particles	
Leptons	Quarks						
First family	Second family	Third family		electromagnetic force	photon		
electron neutrino	muon neutrino	tau neutrino		weak force	W, Z		
electron	muon	tau		strong force	gluons		
up	charm	top					
down	strange	bottom					

The Standard Model today. It unifies all the fundamental building blocks of matter and three of the four fundamental forces. While all known matter is built with particles from the first family, the other particles exists but only for extremely short time periods. To complete the Model a new particle is needed – the Higgs particle – that the physics community hopes to find in the new built accelerator LHC at CERN in Geneva.

What is New Physics or Physics of Mind ?

Physics of Mind

Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called 'orchestrated objective reduction' ('Orch OR'), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain's neurons, vibrations which interfere, 'collapse' and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to 'deeper order' ripples in spacetime geometry. Consciousness is more like music than computation. Colleagues Travis Craddock and Jack Tuszynski and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders.

Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

Fig. 1 Divine Mechanics Unit –CCP, CP and information s– Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations. New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by "I" about 5000 years back to Arjuna in Mahabharata as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, it is automatic system of the universe. The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side). These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all information s of the universe. It is face identity of Anti mind particles as data of all information's of the universe are stored as anti mind particles. It is the Time mind ness (biological clock)

that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes) . That translates the messages and realizes it and reacts accordingly.[2]

1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

Fig. 2 Parallel teaching by participatory science

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons , primary fermions, primary bosons , Basic Building Blocks , Mind and Tachyons as shown in Fig 3

Standard model completed with Fundamental particles and Mind And Tachyons

Fig. 3 standard Model chart [3]

Fig.3.1 one creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1. Mass -The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.
2. Matter:-Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.
3. Inertial mass:-Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.
4. Gravitational mass :- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.
5. Pure m (matter) mass:-matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.
6. Energy mass:-Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc) units.
7. m (impure matter) of $E=mc^2$:-Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain.

Fig 4 Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
2. OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me”.
3. Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me”.
4. Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “ o god help me ”

- CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PCPs) and finally there is activated message of "o god help me" is formed .
- CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets halt.

Having formed the message it comes out in three forms. In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called **THOUGHT RAY (Quantum entanglement)** which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards **REALIZING CENTER** situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

Where Does Prayer Message go ? Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called **ATOMIC GENETIC ENGINEERING** as shown in **Figure 4.1** The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. **Or diseased cell gets cured [6]** as shown in **Fig 4.1**

Fig . 4.1 A.G.E and Final stamp of success to New Theory[6]

1.5 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system. After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms ,molecules, cells, and even individuals talk with one another. After the formation of the cell, nature created one more system called THIRD TRANSCRIPTION. Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed. These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

Fig. 5 Messages system of the universe

1.6 How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in fig 6 and fig 7. there are two types of thought stimulation [2]. One is conditioned thought stimulation and other one is unconditioned thought stimulation. stimulation of thought expression--there are two types of thought expressions one is conditioned stimulation of thought expression, and other one is self stimulation of thoughts i.e. unconditioned stimulation of thought expression .at the time of the origin of the universe, all effects got created. The cause of all effects of the universe is thought expression. These thought expressions were triggered by unconditioned or self stimulated way. It is the first step and it is followed by programming or formation of programmed messages by code pcps. This programmed message moves from higher centers to target b.b.bs. It is called interaction. Having received the messages, the mind and mass of the target b.b.bs. Work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target b.b.bs. Would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called effect. appearance of new shapes. Properties and laws is called transmutation. The first three steps are collectively called ccp. During transmutation process if ccp is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

The subatomic particle are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry. So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

Fig. 6 Divine Mechanics – How Does Nature work ?

Fig. 7 Conditioned and Unconditioned thought expressions

1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units ,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons). Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of

the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8

1.8 Origin of the universe [7]

Fig. 9 Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in **Fig-3** were in the form of tachyons as shown in **Fig- 9** [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the **highest center** of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in **Fig 3.1**. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of **COLD DARK MATTER (C.D.M)** and canals in it. With the result space got created. At the other end of the canals, hot reaction started (**the relics are back ground radiations 2.7 degree K of our hydrogen clouds**). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus **QUASARS** appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in **Fig 9** . With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The **HUBBLE LAW**, can thus be explained. With some more passage of time, clouds were joined to form **GMC** (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era. It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated. I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe , it was mind reality that triggered symmetry breaking phase . It is

mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle. There is nothing like artificial intelligence in the universe. These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe). His mind could be manipulated by prayer only. as shown in figure 9.1 and 9.2

1.10 Divine Mechanics and Brain Computation

Learning and Memory and information s (Code PcPs) Net work in Brain [10]

Divine Mechanics and Brain Computation

Fig 12 Divine Mechanics of Brain Computing System – Learning and memory

At all steps, these are B.B.Bs (B-Bit) that are responsible for information's control and triggering . If CCP is written it means unless atomic transcription and translation occur, brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life. These are higher thought expressions of B.B.Bs. In Bits of classical computers and qubits of QC, the thought expressions are lower and different but the mechanics (DIVINE) remains the same. as shown in Fig 12

Physics dictates the lowest limit of size of chip **but DIVINE mechanics does not**
Moore's Law Modified and Completed

Fig 13- The Theory of Computers and Brain are same – DIVINE MECHANICS

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP , Code PcPs and CP.) DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13 Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not. Hence the bit is a typical unit of information. ((Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system, it is the different thoughts expressions that describe informations. Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron , at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B- bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence information s are eternal.In computers, Bit is a structural configuration that describes information s of the system and information s are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different . But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal . In both the effect of describing informations would be different.One is classical (thought expressions are fixed and limited)and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results .) . In life sciences in Brain the bit is again Photon and the information s are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS. In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age /real age) . It is Higher functions of B.B.B or B Bit and it is life. Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

II. Structure

2.1 Phenomenon of Oscillation in micro particles – Photon’s Oscillation and Creation Physics and Origin of Universe

Fig 14 – Phenomenon of Oscillation in Photon

Creation Physics - Unless Thought (CCP), at each step of creation is expressed Symmetry Broken could not be triggered .

Fig 14.1 – Phenomenon of symmetry broken (Creation Physics- both Dark matter and Hot matter) Triggered by Thought Not by SSB (Spontaneous Symmetry Broken)

Divine Mechanics of Neutrino Oscillation
How the electron neutrino turns into superimposition of three mass states ?

Fig. 19.1 Divine mechanics of Neutrino Oscillation

In atomic transcription and translation of Neutrino Oscillation, following steps take place on Yang B.B.B – B-Bit as shown in Figure 19 and Fig 19.1. Time mindness triggers and regulate the mechanism step by step.

1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of “**Type of Neutrino Oscillation either by add or break**” atomic transcription triggers.
2. OM triggers activation of free mind particles (sky blue -inactivated code PCPs) of that thought script (magenta) of “**Type of Neutrino Oscillation either by add or break**”.
3. Free mind particles (sky blue -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “**Type of Neutrino Oscillation either by add or break**”.
4. Messenger atomic genes (blue) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (red) of “**Type of Neutrino Oscillation either by add or break**”
5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PCPs) and finally there is activated message of “**Type of Neutrino Oscillation either by add or break**” is formed .
6. CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets **halt**.

This Code PcPs Type of Neutrino Oscillation information’s (**either by add or break**) spread in other electron neutrinos coming to earth. Having received the messages, electron neutrinos trigger metamorphism (**either by add or break**)(by adding or by removing amount of Energized Gravitons and Higgs Particles) into muon neutrino and tau neutrinos and vice versa . That is how Time mindness triggers metamorphism in many electron neutrinos coming to earth from sun as shown in Fig 20 Oscillation or metamorphosis (**either by add or break**) (their mass can vary by flavor- by adding or by removing amount of Energized Gravitons and Higgs Particles) of neutrinos or Bit (mass)is unconditioned (triggered by time mindness or biological clock) property of mass part of reality of basic Building blocks and it is triggered and controlled by virtue of Atomic genes part of reality.Types(different flavor or masses) of oscillation or metamorphosis of neutrinos is due to change in mass state (**either by add or break**) part of reality to follow all orders made by CCP (thought script) . Once the information’s (Code PcPs different masses - oscillation or metamorphosis of neutrinos) are formed, the Bits (Neutrinos (ν_e) And Other ν_e) translate it and they works accordingly. That is how mind and mass (Bit Neutrinos (ν_e) And Other ν_μ and ν_τ) work together at the level of particle level and new neutrinos ν_μ and ν_τ are formed from many ν_e or vice versa.These are fed thoughts and feeding was done in pre creation era by Highest center of the universe in higher centers controlling oscillation or metamorphosis of neutrinos

Fig. 20 complete depiction of Metamorphosis (either by add or break) of electron neutrinos into tau neutrinos and muon neutrinos- modified or vice versa

2.5Atomic transcription of Positive and negative oscillation of Higgs bosons or mechanism that contributes to our understanding of the origin of mass of subatomic particles (micro level Fig 21)

Divine Mechanics of Higgs Oscillation
How the Higgs (secondary boson) turns into super imposition of different mass states of Energy B.B.B, BE-1, BE-2, (negative oscillation) BE-3, BE-4and BE -5 (positive oscillation) ?

Fig. 21 Divine mechanics of Higgs Oscillation (micro level)

In atomic transcription and translation of Higgs Oscillation, following steps take place on Yin B.B.B – B-Bit as shown in . Time mindness triggers and regulate the mechanism step by step.

1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of “**Type of Higgs Oscillation either by add or break**”atomic transcription triggers.
2. OM triggers activation of free mind particles (sky blue -**inactivated code PCPs**) of that thought script (magenta) of “**Type of Higgs Oscillation either by add or break**”.
3. Free mind particles (sky blue -**inactivated code PCPs**) get attached to anti mind particles script (magenta one) to form messenger thought script of “**Type of Higgs Oscillation either by add or break**”.
4. Messenger atomic genes (blue) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (red) of “**Type of Higgs Oscillation either by add or break**”
5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “**Type of Higgs Oscillation either by add or break**” is formed .
6. CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets **halt**.

This Code PcPs Type of Higgs Oscillation information's (**either by add (positive oscillation) or break(negative oscillation)**) spread in other primary units . Having received the messages, primary units trigger metamorphism (**either by add or break**) (by adding or by removing amount of primary units of Higgs Particles) into Energy B.B.B or Yin, BE-1, BE-2, BE-3, BE-4 and BE-5 and vice versa. That is how Time mindness triggers metamorphism in many Higgs as shown in Fig 22, Fig 23 and Fig 24 (macro level) Oscillation or metamorphosis (**either by add or break**) (their mass can vary by flavor- by adding or by removing amount of primary units of Higgs Particles) of Higgs or Bit (mass)is unconditioned (triggered by time mindness or biological clock) property of mass part of reality of basic Building blocks and it is triggered and controlled by virtue of Atomic genes part of reality.Types (different flavor or masses) of oscillation or metamorphosis of Higg's is due to change in mass state (**either by add or break**) part of reality to follow all orders made by CCP (thought script) . Once the information's (Code PcPs different masses - oscillation or metamorphosis of Higgs) are formed , the Bits (Higg's) translate it and they works accordingly . That is how mind and mass (Bit Higgs) work together at the level of particle level and new Higgs (Energy B.B.B or Yin , BE-1. BE-2, BE-3, BE-4 and BE-5) are formed from many Higgs (secondary bosons) . These are fed thoughts and feeding was done in pre creation era by Highest center of the universe in higher centers controlling oscillation or metamorphosis of Higgs bosons. There are many thoughts that are expressed during oscillation of Higgs bosons but to understand the concept, I have depicted few thoughts . There is feed back to higher center before the next thought is triggered .

Fig. 22 Positive oscillation (BE-3) and negative oscillation (BE-2, BE-1and Energy B.B.B or Yin) of Higgs bosons (macro level)

Fig 23 Positive oscillation (BE-4 and BE-5) of Higgs bosons (macro level)

Fig 24 Higgs Bosons found in LHC are not Fundamental particles. Higgs boson (positive oscillation Higgs or BE-4) is a very massive particle and also decays almost immediately . Positive oscillation (BE-4) of Higgs bosons (macro level)

Fig 24.1 Higgs Bosons found in LHC are not Fundamental particles. Higgs boson (positive oscillation Higgs or BE-4) is a very massive particle and also decays almost immediately

Fig 25 Nobel prize physics 2013 (Wrong Depiction) on Illusion as both Origin (BigBang) and Spontaneous Symmetry breaking phase by Higgs are Fake Theories . Unless Thought is triggered , Tachyons could not enter into symmetry breaking Phase (Right depiction) in Hoyle –Narlikar Universe.

III. Conclusion

They found as shown in Fig 24 , a new particle with a mass of about $125 \text{ GeV}/c^2$ (about 133 proton masses, on the order of 10^{-25} kg), which is "consistent with the Higgs boson." When protons collide, **they created Massive Higgs bosons**. These are positive oscillation Higgs particle (BE-4). These **Higgs boson** (positive oscillation) ($125 \text{ GeV}/c^2$) **are not fundamental particles** . Higgs boson found in LHC is a very massive particle and also decays almost immediately To understand oscillation or metamorphosis of micro particles (neutrinos or Higgs) , we have to understand Basic Building Blocks of the universe as shown in Fig 1 (mass – B.B.B Bit or B-Bit) and Information s (Code PcPs) and Divine Mechanics Unit (CCP , Code PcPs and CP). Oscillation or metamorphosis of microparticles (neutrinos or Higgs) is unconditioned (triggered by time mindness or biological clock) property of mind part of reality of basic Building blocks . Types (different masses) of oscillation or metamorphosis of neutrinos or Higgs are due to mass part of reality of B.B.B to follow all orders made by CCP (thought script) . Once the information's (Code PcPs of different masses - oscillation or metamorphosis of neutrinos or Higgs) are formed, it spreads by first transcription (re-transcription) to other Bits (mass reality of B.B.B). Having received the informations (Code PcPs or different shapes or masses) the bits (mass reality of B.B.B) of Higgs (secondary boson) retranslate it and they work (by adding or by removing different sub units of Higgs Particles – secondary bosons) accordingly . That is how mind and mass (Bits or mass of Higgs) work together (by adding – positive oscillation) at the level of particle level and they form BE-3. , BE-4 and BE-5 new particles that form masses of other big particles and nucleus (lepto-Quarks, proton and neutron and nucleus).Similarly mind and mass (Bits or mass of Higgs) work together (by breaking – negative oscillation) at the level of particle level and they form, BE-2, BE-1 and Energy B.B.B or Yin new particles that form mass of primary fermions , primary bosons and energized gravitons and B.B.B . Higgs Bosons found in LHC are not Fundamental particles. Higgs boson (positive oscillation Higgs or BE-4) found in LHC is a very massive particle and also decays almost immediately. Thus for the theoretical discovery of a mechanism that contributes to our understanding of the origin of mass of subatomic particles is research of B.B.B (Mind and Mass) rather than any other mechanism proposed by Peter Higgs or by François Englert . Mathematics has no thought of mind and thought of Creator (Almighty B.B.B). Hence Nobel prize physics 2013 is on Illusion or Fiction.
