Nobel Prize Physics 2016 ("For Theoretical Discoveries of Topological Phase Transitions and Topological Phases of Matter") is on Illusion. Topological Phase Transition of Matter and Different Phases of Matter Both are Triggered by Separate Mind (Divine Mechanics or Divine MONB) and Their Simultaneous Expression is Independent of Each Other (Mandel’s Law of Independent Assortment).

Dr V M Das
Das Nursing Hom, Fatehgarh, India University Of God

Abstract: Basic mechanism of topological phase transition (different arrangement of elements) of matter and phases of matter (different states or any property of matter) is still obscure. The reason being, one is not equipped with basic knowledge of structure of the matter, origin of the universe and atomic genetics as taught by a new science called participatory science. If one breaks the matter, one would get its last and smallest particles called basic building blocks (B.B.Bs.) of which all fermions and bosons are composed. From these fermions and bosons all the matter of the universe is formed including human cell. These basic units are divine in the sense that they talk with each other by phenomenon called atomic transcription and translation. These are fundamental particles and atomic transcription and translation are fundamental working of the nature. These B.B.Bs. have power to transmutate to form bigger units of the universe like particles, atoms, molecules, cells, individuals, earth, solar system, galaxies etc. So, all effects of the universe are triggered by atomic transcription and translation or thought expressions. Before origin of the universe, these B.B.Bs. were in the form of tachyons. Out of the infinite tachyons one became the highest center of the universe. It had fed its thoughts to rest of B.B.Bs. that they would express only those thoughts to give desired effects as wished by highest center of the universe. Thus our universe appeared into existence and all effects are triggered by atomic transcription or thought expressions. The normal matter structures (topological phase transition – different arrangement of elements) and phase of matter (different state of matter or any property of matter) are triggered by normal thought expressions of normal structural configuration (topological phase transition – arrangement of elements) and normal different state of matter or any property of matter. That is why we observe normal structural configuration (topological phase transition – arrangement of elements) and normal different state of matter or any property of matter. When these normal thought expressions are inhibited and another normal thought expressions are triggered, the same matter transmute into another structural configuration (topological phase transition – arrangement of elements) and another state of matter (different state or phase of matter or any property of matter). These another normal thought expressions are triggered by conditioned thought expression (change of temperature) as these are fed thoughts and feeding was done in precreation era by Highest center of the universe (Almighty B.B.B). If the phenomenon (of topological phase transitions and phases of matter) is not being explained by mind theory (Divine Mechanics), the mathematical theory for explaining the phenomenon is illusion as mathematics does not have thought of mind and thought of Creator (Almighty B.B.B). Whether these exotic material (phases of matter) could be useful to us in exploring new hopes, (that topological materials could be used in new generations of electronics and superconductors, or in future quantum computers) could not be predicted with surety but it is sure that Almighty B.B.B could reprogram superconductivity and quantum computers at room temperature. These are prerequisites for to understand how to make dead persons alive.

Keywords: Basic Building Blocks, Atomic Genetics, Atomic Transcription and Translation, Tachyons, topological phase transitions and different phases of matter
I. Introduction

4 October 2016 The Nobel Prize in Physics 2016 was divided, one half awarded to David J. Thouless, the other half jointly to F. Duncan M. Haldane and J. Michael Kosterlitz "for theoretical discoveries of topological phase transitions and topological phases of matter".

The Royal Swedish Academy of Sciences has decided to award the Nobel Prize in Physics 2016 with one half to

David J. Thouless
University of Washington, Seattle, WA, USA

and the other half to

F. Duncan M. Haldane
Princeton University, NJ, USA and

J. Michael Kosterlitz
Brown University, Providence, RI, USA

"for theoretical discoveries of topological phase transitions and topological phases of matter"

They revealed the secrets of exotic matter

This year’s Laureates opened the door on an unknown world where matter can assume strange states. They have used advanced mathematical methods to study unusual phases, or states, of matter, such as superconductors, superfluids or thin magnetic films. Thanks to their pioneering work, the hunt is now on for new and exotic phases of matter. Many people are hopeful of future applications in both materials science and electronics. The three Laureates’ use of topological concepts in physics was decisive for their discoveries. Topology is a branch of mathematics that describes properties that only change step-wise. Using topology as a tool, they were able to astound the experts. In the early 1970s, Michael Kosterlitz and David Thouless overturned the then current theory that superconductivity or superfluidity could not occur in thin layers. They demonstrated that superconductivity could occur at low temperatures and also explained the mechanism, phase transition, that makes superconductivity disappear at higher temperatures. In the 1980s, Thouless was able to explain a previous experiment with very thin electrically conducting layers in which conductance was precisely measured as integer steps. He showed that these integers were topological in their nature. At around the same time, Duncan Haldane discovered how topological concepts can be used to understand the properties of chains of small magnets found in some materials. We now know of many topological phases, not only in thin layers and threads, but also in ordinary three-dimensional materials. Over the last decade, this area has boosted frontline research in condensed matter physics, not least because of the hope that topological materials could be used in new generations of electronics and superconductors, or in future quantum computers. Current research is revealing the secrets of matter in the exotic worlds discovered by this year’s Nobel Laureates.

What is New Physics or Physics of Mind?

Physics of Mind

DOI: 10.9790/7388-0606052950 www.iosrjournals.org 30 | Page
Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to be conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually is, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation.
Colleagues Travis Craddock and Jack Tuszyński and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders.

Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations. New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “I” about 5000 years back to Arjuna in Mahabharata. as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties conscious ness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, it is automatic system of the univers. The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side). These are named as code FCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles. It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP). There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes). That translates the messages and realizes it and reacts accordingly.[2]
1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons, primary fermions, primary bosons, Basic Building Blocks, Mind and Tachyons as shown in Fig 3

Fig. 2 Parallel teaching by participatory science

Fig. 3 standard Model chart [3]
Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1. **Mass** - The part which gives shape to the smallest mass unit i.e., basics building blocks (B. B. Bs.) is called mass.

2. **Matter** - Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.

3. **Inertial mass** - Mass (smallest mass units i.e., B.B.Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.

4. **Gravitational mass** - The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.

5. **Pure m (matter) mass** - Matter mass (smallest mass unit or B.B.Bs) which have got inertial property of absolute rest.

6. **Energy mass** - Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc.) units.

7. **m (impure matter) of E=mC^2** - Matter particles (fermions) which have got spin property are called impure matter particles.

### 1.4 Prayer message formation in brain.

**Fig 3.1** one creation and destruction cycle [4]

**Fig 4** Divine Mechanics - Prayer message formation in brain
In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

1. CP removes RM (repressor mindness-green) from OM (operating mindness-orange) thus induction of atomic transcription triggers.

2. OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me”.

3. Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me”.

4. Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “o god help me”.

5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PCPs) and finally there is activated message of “o god help me” is formed.

6. CP represses atomic transcription by adding RM (green) to OM (orange). Thus atomic transcription gets halt.

Having formed the message it comes out in three forms. In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of ‘O GOD HELP ME’ is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called THOUGHT RAY (Quantum entanglement) which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards REALIZING CENTER situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4.

Where Does Prayer Message go? Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5and 6) to normal (2 and 3). This shifting of thought expression is called ATOMIC GENETIC ENGINEERING as shown in Figure 4.1 The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmute into normal cells. Or diseased cell gets cured [6] as shown in Fig 4.1

![Fig. 4.1 A.G.E and Final stamp of success to New Theory](image-url)
1.5 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system. After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms, molecules, cells, and even individuals talk with one another. After the formation of the cell, nature created one more system called THIRD TRANSCRIPTION. Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed. These three types of message systems are working in the nature. These message system are being used by the nature according to nature’s need. as shown in Fig 5

Fig. 5 Messages system of the universe
1.6 How does nature work & triggering of normal & abnormal effects

To Understand Creation Physics As Shown In Fig 6 And Fig 7. There Are Two Types Of Thought Stimulation [2]. One Is Conditioned Thought Stimulation And Other One Is Unconditioned Thought Stimulation. Stimulation Of Thought Expression --- There Are Two Types Of Thought Expressions One Is Conditioned Stimulation Of Thought Expression, And Other One Is Self Stimulation Of Thoughts I.E. Unconditioned Stimulation Of Thought Expression. At The Time Of The Origin Of The Universe, All Effects Got Triggered. The Cause Of All Effects Of The Universe Is Thought Expression. These Thought Expressions Were Triggered By Unconditioned Or Self Stimulated Way. It Is The First Step And It Is Followed By Programming Or Formation Of Programmed Messages By Code Pcps. This Programmed Message Moves From Higher Centers To Target B.B.Bs. It Is Called Interaction. Having Received The Messages, The Mind And Mass Of The Target B.B.Bs. Work In A Synchronized Way So As To Produce The Effects As Thought By A The Higher Center. If The Thought Expression By Higher Center Is Normal, The Shapes, Properties And Laws Produced By Target B.B.Bs. Would Be Normal And If The Thought Expressions Are Abnormal, The Shapes, Properties And Laws Would Be Abnormal. This Is The Basic Concept Of Transmutation Phenomenon. Finally What We Observe Is Called Effect. Appearance Of New Shapes. Properties And Laws Is Called Transmutation. The First Three Steps Are Collectively Called Ccp. During Transmutation Process If Ccp Is Written, It Does Mean That Unless The Thought, Programming And Interaction Take Place, Nature Cannot Transmute. Transmutation Phenomenon Is Seen In Particles, Atoms, Molecules And Even In Cells. The Basic Steps Of Any Transmutation Remain The Same Except That The Thought Expressions Differ. The subatomic particle are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry. So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

Fig. 6 Divine Mechanics – How Does Nature work?
1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units, nature created secondary units i.e. secondary fermions and secondary bosons. Similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons & neutrons). Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to lowest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8.
1.8 Origin of the universe [7]

Hoyle – Narlikar Universe

ORIGIN OF THE UNIVERSE
CONTINUOUS CREATION THEORY----

HOYLE AND NARLIKAR THINK THAT NEW MATTER IS BEING CREATED DUE TO 'IMPSION' TO BALANCE THE EXPANSION OF THE UNIVERSE, WHICH ASTRONOMERS HAVE OBSERVED, INSIDE 'QUASI STRARS' GRAVITATIONAL COLLAPSES MAY FORM SOME MATTER IN THE UNIVERSE, THE HUGE LUMINOSITY AND THE RADIOEMISSION FROM THESE QUASI STRARS APPEAR TO BE 'GRAVITY POWERED' UNLIKEORDINARY STARS WHICH DERIVE THEIR ENERGY FROM NUCLEAR REACTIONS.

Fig. 8 Messages Net work of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in Fig. 3 were in the form of tachyons as shown in Fig. 9 [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the highest center of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the...
universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs, and from these B.B.Bs, formation of fermions and bosons take place as shown in Fig 3.1. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of COLD DARK MATTER (C.D.M) and canals in it. With the result space got created. At the other end of the canals, hot reaction started (the relics are background radiations 2.7 degree K of our hydrogen clouds). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus QUASARS appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in Fig 9. With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The HUBBLE LAW, can thus be explained. With some more passage of time, clouds were joined to form GMC (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated. I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe, it was mind reality that triggered symmetry breaking phase. It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle. There is nothing like artificial intelligence in the universe. These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B, or Male B.B.B working as Highest center of the universe). His mind could be manipulated by prayer only. as shown in figure 9.1 and 9.2

---

**Figure 9.1** Hoyle Narlikar Universe
1.9 DM and DE i.e. energized gravitons and energy pool of the universe as shown in Fig 10 and Fig 11 [8]
Fig 11: Structural configuration of DM and DE at macro level [9]

1.10 Divine Mechanics and Brain Computation
Learning and Memory and information s (Code PcPs) Network in Brain [10]
At all steps, these are B.B.Bs (B-Bit) that are responsible for information’s control and triggering. If CCP is written it means unless atomic transcription and translation occur, brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life. These are higher thought expressions of B.B.Bs. In Bits of classical computers and qubits of QC, the thought expressions are lower and different but the mechanics (DIVINE) remains the same as shown in Fig 12.

Fig 13 - The Theory of Computers and Brain are same – DIVINE MECHANICS

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP, Code PcPs and CP.) DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13 Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not. Hence the bit is a typical unit of information. (Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system, it is the different thoughts expressions that describe informations. Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron, at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B-bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence informations are eternal. In computers, Bit is a structural configuration that describes informations of the system and informations are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different. But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal. In both the effect of describing informations would be different. One is classical (thought expressions are fixed and limited) and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results). In life sciences in Brain the bit is again Photon and the informations are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS. In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age / real age). It is Higher functions of B.B.B or B-Bit and it is life. Hence there is difference in some aspect of DIVINE MECHANICS of Computers computation and Brain computation.
II. Structure

2.1 Modified theory of atomic structure as Niels Bohr’s theory has limitations in explaining different series of hydrogen spectra.

New assumptions of structure of hydrogen atom—Divine Modified Niels Bohr’s Theory (Divine MONB)

1. Hydrogen atom is like a miniature solar system with the negatively charged electron moving in circular orbit around positively charged nucleus having positively charged particle proton. In this circular orbit or stationary orbits, electron is being held by single string of energized gravitons. This energy level is called ground state.

2. When Hydrogen atom is excited, the electron moves from ground state to excited state energy levels making a bigger circular orbit and having reached in this new energy levels, it also emits radiations. Hence absorption and emission of energy quanta occur simultaneously. Shifting is understood in inter orbital shift phenomenon.

3. When excitation is over, the electron once again come back to ground state energy level. All above mentioned events are triggered by different thoughts or atomic transcriptions from the nucleus or proton in case of hydrogen atom.

4. These atomic transcriptions are being triggered by conditioned stimulation of CCP by the message system made up of photons (second transcription or -ve charged photons or afferent path) coming from electron to proton and further they are transmitted by photons (second transcription made up of +ve charged photons, or efferent path) to electron. Having received the messages, electron works accordingly. Unless the thought is expressed, nature cannot work. As shown in Fig 7

5. When electron is in ground state, its interaction with energized graviton and electromagnetic photon is more hence IP -13.59 ev (n=1) is required to remove electron from this energy level. During excited stage the interaction is different hence IP to remove electron from this state is -3.4 ev (n=2), -1.511 ev (n=3), 0.850 ev (n=4), -0.544 ev (n=5) respectively. It is the changing thought of interaction with energized graviton and electromagnetic photons that gives changing effect.

6. Electronic configuration of higher atoms could be known by studying I.P. curve. Working of hydrogen atom as shown in Fig 14.

![Diagram of hydrogen atom](image)

Fig 14 working of hydrogen atom – Divine MONB Theory

2.2 Laws of Atomic Genetics in relation with Cancer and topological phase transition (arrangement of elements) of matter and phase of matter (different states or any property of matter)

![Diagram of cancer transmutation](image)

Fig 15 – Phenomenon of Cancer transmutation
Having read Atomic genetics and Basic etiology of the cancer, now we discuss how atomic genetics trigger molecular effects like genetic damage etc during carcinogenesis. ATOMIC GENETICS is a new branch of science in which we study about Laws, PROPERTIES and FUNCTIONS of atomic genes. Now I shall highlight the laws on which atomic genes work. As we have seen that Gregor Mendel had made three laws of inheritance known as ---

1. The principle of Dominance---- Mendel therefore concluded that what were transmitted from parent to offspring were discrete factors. Each factor contained information about the form of the trait. The factor associated with the form which was expressed in the hybrid offspring (F1) was DOMINANT. For example, the factor for yellow seed color was a dominant factor. The factor associated with the form which remained hidden in the F1 but reappeared in the F2 was RECESSIVE. Thus the factor for the green seed color was recessive. Mendel's factor is now recognized as the gene. In atomic genetics this law is interpreted like this ---- During atomic transcription or thought expressions few thoughts are expressed and these are called dominating thoughts and rest thoughts which are not expressed are called recessive thoughts. Thus particles, atoms and molecules show only those properties which are triggered by dominating thought expressions. During transmutation, dominating thoughts get recessive while recessive thoughts get dominant. Single effect or property is triggered by single dominating thought expression or atomic transcription. For example-- Normal genetic arrangements are triggered by normal arrangement genetic dominating thought expressions while genetic damage is triggered by abnormal arrangement genetic dominating thought expressions. Abnormal arrangement genetic thought expression is triggered by carcinogens only after normal arrangement genetic thought expressions get recessive. Or we can say normal genetic arrangement are triggered by normal arrangement genetic thought expressions and when carcinogens come in contact with the cell, they shift the thought expression from normal to abnormal genetic arrangement. With the result we observe genetic damage. Thus carcinogens suppress dominating normal arrangement genetic thoughts and they trigger abnormal arrangement recessive genetic thoughts. With the result genetic damage is seen.

2. The Principle of Segregation----The principle of segregation states that allele pairs separate or segregate during gamete formation, and the paired condition is restored by random fusion of gametes during fertilization. In atomic genetics it will be interpreted like this --- There is separate atomic transcription for separate effects. So if there are hundred effects, they all are triggered by hundred separate thought expressions or atomic transcriptions. For example --- Genetic damage is triggered by separate thought expression and rapid growth is triggered by separate thought expression and dedifferentiation is triggered by separate thought expression. And all these thought expressions are triggered by carcinogens. But the timing of thought expressions is different. Genetic damage thought expression is first to trigger and later rapid growth and dedifferentiation thought expressions.

3. The Principle of independent assortment---- The principle of independent assortment states that if we consider the inheritance of two or more genes at a time, there distribution in the gametes and in the progeny of subsequent generations is independent of each other. In atomic genetics it will be interpreted like this---- In one phenomenon, if two or more than two transcriptions or thought expressions are expressed that will give rise to two or more than two effects, It does not mean that there expression is DEPENDENT ON EACH OTHER. For example --- In phenomenon of carcinogen sis, there is effect of genetic damage, there is effect of rapid growth and there is effect of dedifferentiation. All these effects are triggered by separate thought expressions. The simultaneous expression of these atomic transcriptions is independent of each other. Or these thoughts expressions are the part of the carciogenesis phenomenon but their expressions are independent of one another. It does mean that for rapid growth thought expression, genetic damage thought expression is NOT essential. Having informed about the laws and working of atomic genes, Now we discuss phenomenon of carcinogen sis, which is triggered by, outer stimuli like physical, chemical carcinogens or virus or they are self stimulated i.e. hereditary factors.
2.3 Laws of Atomic Genetics in relation with topological phase transition (different arrangement of elements) of matter and phases of matter (different states or any property of matter)

Phenomena of Topological phase transition (Different arrangement of elements No-2) and Phases of Matter (different states or any property (electrical conductivity) of matter – No 1 and No 3).

Phenomena of Topological phase transition (Different arrangement of elements No-2 of Fig 16) is triggered by separate thought and Phases of Matter (different states or any property of matter – No 1 and No 3 of Fig 16) are triggered by separate thoughts. Their simultaneous expression is independent of each other. It means of Fig 16 – no 1, with formation of plasma, gas, liquid and solid and quantum condensate (phases of matter) has nothing to do with changing of pattern of water molecules or elements (Different arrangement of water molecules or elements). But their simultaneous expression does not mean that there is a relationship between topological phase transition (Different arrangement of elements No-2) and phases of matter (different states or any property of matter – No 1 and No 3). There are many thoughts that are triggered step by step in both topological phase transition and different phases of matter. But to understand the concept few thoughts are depicted in diagram. There is feedback mechanism before the next thought is triggered. It is TM (time mindness) the regulates the phenomenon. It is Temperature mindness that triggers the both phenomena. Hence it is conditioned stimulation of two CCPs.

2.4. Atomic transcription of Topological phase transition – no 2 of Fig 16 (micro level)
In atomic transcription and translation of Topological phase transition, following steps take place on Yang B.B.B – B-Bit (higher center) Temperature mindness triggers the Topological phase transition (conditioned thought expression). There is phenomenon of Memory search (of the result as it is there in memory after learning) by CP. Having searched the result, there is phenomenon of memory expression of the result by CP.

1. CP removes RM (repressor mindness-green) from OM (operating mindness-orange) thus induction of atomic transcription of result is triggered.
2. OM triggers activation of free mind particles (blue - inactivated code PCPs) of that thought script (magenta of “Code PcPs “Topological phase transition”).
3. Free mind particles (blue - inactivated Code PcPs Topological phase transition) get attached to anti mind particles script (magenta one) to form messenger thought script of “Code PcPs Topological phase transition.
4. Messenger atomic genes (blue) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (sky blue – open eye) of “Code PcPs Topological phase transition.”
5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PCPs) and finally there is activated message of “Code PcPs Topological phase transition” is formed.
6. CP represses atomic transcription by adding RM (green) to OM (orange). Thus atomic transcription gets halt.

2.5 Atomic transcription of Phases of Matter (different states or any property of matter – No 1 and No 3 of Fig 16) (micro level)

In atomic transcription and translation of Phases of Matter, following steps take place on Yang B.B.B – B-Bit (higher center) Temperature mindness triggers the Phases of Matter (conditioned thought expression). There is phenomenon of memory search (of the result as it is there in memory after learning) by CP. Having searched the result, there is phenomenon of memory expression of the result by CP.

1. CP removes RM (repressor mindness-green) from OM (operating mindness-orange) thus induction of atomic transcription of result is triggered.
2. OM triggers activation of free mind particles (blue -inactivated code PCPs) of that thought script (magenta) of “Code PcPs Phases of Matter”.
3. Free mind particles (blue –inactivated Code PcPs Phases of Matter) get attached to anti mind particles script (magenta one) to form messenger thought script of “Code PcPs Phases of Matter”.
4. Messenger atomic genes (blue) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (sky blue – open eye) of “Code PcPs Phases of Matter”.
5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “Code PcPs Phases of Matter” is formed.
6. CP represses atomic transcription by adding RM (green) to OM (orange). Thus atomic transcription gets halt.

Divine MONB underpins Phases of matter (micro level)
Nobel Prize Physics 2016 ("For Theoretical Discoveries of Topological Phase Transitions and..."

Divine MONB underpins Phases of matter as well change in electrical conductivity of matter (macro level)

Fig 22 Divine MONB underpins Phases of Matter (different states or any property (electrical conductivity) of matter – No 1 and No 3 of Fig 16) (macro level)

Divine MONB underpins different Phases of matter as well as topological phase transition of matter (macro level)

Fig 23 Divine MONB underpins both Phases of Matter (different states – physical property of matter) and topological phase transition (structural configuration – different arrangement of elements – No 1 of Fig 16) Both are Triggered By Separate Mind (Divine Mechanics Or Divine MONB ) And Their Simultaneous Expression Is Independent Of Each Other (Mandel’s Law Of Independent Assortment) (macro level)

III. Conclusion

The basic principles that govern, topological phase transition (different arrangement of elements) of matter and different phases of matter (different states or any property of matter) are the laws made by GREGOR MENDEL i.e. the laws of INHERITANCE. Without shifting the thought expressions from normal to another normal (topological phase transition (arrangement of elements) of matter and different phases (different states or any property of matter) of matter, one cannot have topological phase transition (different arrangement of elements) of matter and different phases (different states or any property of matter) of matter. Our universe is deterministic order of universe and each effect is destined i.e. effects are triggered by thoughts.

and each thought is fed thought and feeding was done in precreation era by Highest center of the universe. Hence all sciences are made by self knowledge of Almighty Basic building block. Thus Einstein’s famous statement that God (Almighty B.B.B) does not play dice ultimately became the truth along with final acceptance to Laplace determinism-- All that had happened had a definite cause and gave rise to definite effect and future of any part of the system could in principle be predicted with absolute certainty ( Only by Almighty B.B.B not by us ) if its state at any time was known in all details Nobel Prize 1932 (for the creation of quantum mechanics) And 1933 (for the discovery of new productive forms of atomic theory) Are On Illusive theory Of Uncertainty Principle Of Heisenberg. Hence Quantum Mechanics atomic model is not correct ( P1 see below ). If the phenomenon (of topological phase transitions and phases of matter) is not being explained by mind theory ( Divine Mechanics ) , the mathematical theory for explaining the phenomenon is illusion as mathematics does not have thought of mind and thought of Creator ( Almighty B.B.B ). Whether these exotic material could be useful to us in exploring new hopes, (that topological materials could be used in new generations of electronics and superconductors, or in future quantum computers) could not be predicted with surety but it is sure that Almighty B.B.B could reprogram superconductivity and quantum computers at room temperature . These are prerequisites for to understand how to make dead persons alive. Their discoveries have not brought about breakthroughs in the theoretical understanding of matter’s mysteries and created new perspectives on the development of innovative materials as math’s is devoid of thought of mind. Hence the nobel prize physics 2016 is on Illusio.

If Spin of particles collapses the entire universe effects (structural effects, physical effects, chemical effects and spectral effects) , life sciences effects would be collapsed. But on the contrary it does not happen. Hence Quantum Mechanics atomic model is not correct.
