Is Space God ? For Clarke , Answer Is No . Primary God Means Two God Particles Made Up of Mind And Mass (Mind-CCP, Code Pcps And CP Mass Or B-Bit). Einstein's Space Time As A Unified Continuum Is Myth . Euclid Geometry Is Applicable In Universe Rather Than Riemannian's Geometry As Big Bang Origin Is Myth.

Abstract : We live in universe "I" an infinite structure made up of Two God Particles (mind and mass) in form of Tachyons . These tachyons particles are found in infinite space which means void or nothing . Hence they have occupied space in which they donot move. In symmetry phase there was a infinite Tachyon structure or mass , made up of Two God Particles (Yang B.B.B and Yin B.B.B) static in nature interconnected with quantum entanglement present in a infinite space . Or in infinite space which is occupied by Infinite numbers of Two God Particles (Yang B.B.B and Yin B.B.B) in form of Tachyons connected with Quantum Entanglement message system having spin velocity 305224 km/sec calling it Universe "I" (Fig 1 and Fig 1 of Fig – 9). Unless there is space or void , space occupying mass or tachyons particles cannot be thought off . It is by virtue of emptiness , tachyons used to be there . After Creation a sphere was made of CDM layer whose density was higher than density of symmetry phase . With the result lot of vacant space got created (Fig 2, 3.and 4 of Fig - 9). In Euclid geometry it is 3D space and it will occupy 3D mass like galaxies etc and they would expand in created space freely which is bounded by CDM layer moving with velocity of light and we are sitting in Milkyway galaxy inside that created hollow sphere .

I. Introduction

1.1What is Space? The 300-Year-Old Philosophical Battle Still rages Today [1] By Emily Thomas, Durham University | November 24, 2017 07:45am ET

How best to strike up conversations with intelligent aliens? Mathematics might be the common lingo. *Credit: ESA/Hubble & NASA*

This article was originally published at The Conversation. The publication contributed the article to Space.com's Expert Voices: Op-Ed & Insights.Mountains. Whales. The distant stars. All these things exist in space, and so do we. Our bodies take up a certain amount of space. When we walk to work, we are moving through space. But what is space? Is it even an actual, physical entity? In 1717, a battle was waged over this question. Exactly 300 years later, it continues. You might think physicists have "solved" the problem of space. The likes of mathematician Hermann Minkowski and physicist Albert Einstein taught us to conceive space and time as a unified continuum, helping us to understand how very large and very little things such as individual atoms move. Nonetheless, we haven't solved the question of what space is. If you sucked all the matter out of the universe, would space be left behind? Twenty-first century physics is arguably compatible with two very different accounts of space: "relationism" and "absolutism." Both these views owe their popularity to Caroline of Ansbach (1683-1737), a German-born Queen of Great Britain, who stuck her oar into the philosophical currents swirling around her. Caroline was a keen philosopher, and in the early 18th century she schemed to pit the leading philosophies of her period against each other. On the continent, philosophers were stuck in "rationalism," spinning world theories from armchairs. Meanwhile, British philosophers were developing science-inspired "empiricism" - theories built on observations. They were worshipping scientists such as Robert Boyle and Isaac Newton.Caroline asked two philosophers to exchange letters. One was the German philosopher Gottfried Leibniz, rationalist par excellence. The other was the English philosopher Samuel Clarke, a close friend of Newton. The two men agreed, and their exchange was published in 1717 as A Collection of Papers. The dull title doesn't sound like much, but these papers were revolutionary. And one of their central issues was the nature of space.

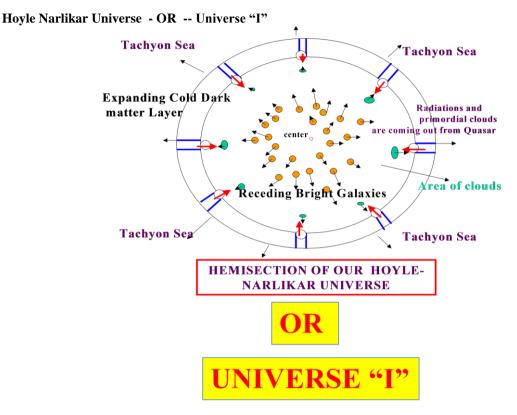

1.3 Everything or nothing?

Is there space between the stars? The relationist Leibniz argued that space is the spatial relations between things. Australia is "south of" Singapore. The tree is "three meters left of" the bush. Sean Spicer is "behind" the bush. That means space would not exist independently of the things it connects. For Leibniz, if nothing existed, there couldn't be any spatial relations. If our universe were destroyed, space would not exist. In contrast, the absolutist Clarke argued that space is a sort of substance that is everywhere. Space is a giant container, containing all the things in the universe: stars, planets, us. Space allows us to make sense of how things move from one place to another, of how our entire material universe could move through space. What's more, Clarke argued that space is divine: space is God's presence in the world. In a way, space is God. For Clarke, if our universe were destroyed, space would be left behind. Just as you can't delete God, you can't delete space.

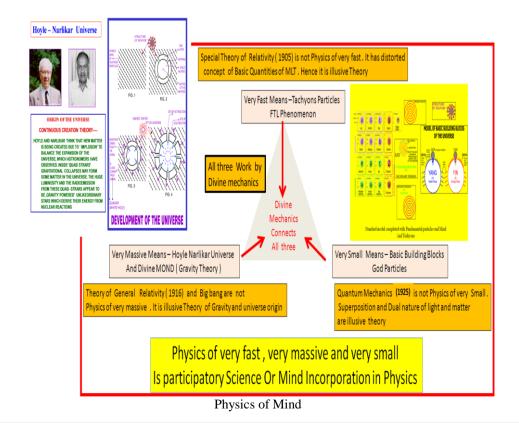

The Leibniz-Clarke letters exploded early 18th century thought. Thinkers like Newton, who were already involved in the debate, were dragged deeper in. Newton argued that space was more than the relations between material objects. He argued it was an absolute entity, that everything moves in relation to it. This led to the distinction between "relative" and "absolute" motion. The Earth moves relative to other material things, such as the sun, but it also moves absolutely – with regard to space. Others joined the party later, like Immanuel Kant. He believed space is just a concept humans use to make sense of the world, rather than a real entity. It wasn't just philosophers and physicists who had views on space either. All sorts of people had their say, from stocking makers to tenant farmers. One especially unlikely discussion of space turns up in Thomas Amory's 1755 Memoirs:Containing the Lives of Several Ladies of Great Britain.

1.4 The problem with God

People were especially edgy about Clarke's view that space is God. Does that mean we're moving through God all the time? God doesn't just see everything, he is everywhere? They also became worried about Big Things. As a whale takes up more space than a holy man, is a whale holier? As mountains are so large, are they like God? The 20th century philosopher Bertrand Russell once argued we shouldn't worship mere size. "Sir Isaac Newton was very much smaller than a hippopotamus, but we do not on that account value him less than the larger beast," he wrote. Some 18th century thinkers would have disagreed - they were worried they should be worshipping a hippopotamus over Newton. Today, the concept of God is disappearing from the debate. Yet some contemporary philosophers, such as Tim Maudlin and Graham Nerlich think that current theories in physics do support Clarke's view (minus the religious parts). Space time is one big container, and all of us move around in it. Other philosophers, such as Kenneth Manders and Julian Barbour, think our best physics is compatible with both views, and there are other reasons to believe Leibniz's theory was right. If the physics really is compatible with absolutism or relationism, then perhaps we should prefer relationism as the simpler theory? After all, why posit a giant entity that acts like a container if we don't have to? As a historian of space and time, I'm fascinated by how the debate has evolved, how something that started 300 years ago has unfurled and grown. Clearly, though the Leibniz-Clarke papers are not well known outside of philosophy, the debate they started continues. Caroline of Ansbach has a lot to answer for. 1.5 What is New Physics or Physics of Mind ?

1.6 Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious 'mind', but who, or what, are 'we' who know such things? How is the subjective nature of phenomenal experience – our 'inner life' - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the 'standard model' - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings ('spikes') and synaptic transmissions, equated with binary 'bits' in digital computing. Consciousness is presumed to 'emerge' from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consciousness to be intrinsic, 'woven into the fabric of the universe'. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called 'orchestrated objective reduction' ('Orch OR'), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain's neurons, vibrations which interfere, 'collapse' and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to 'deeper order' ripples in spacetime geometry. Consciousness is more like music than computation.Colleagues Travis Craddock and Jack Tuszynski and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to

resonate brain microtubules and treat mental, cognitive and neurological disorders. Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

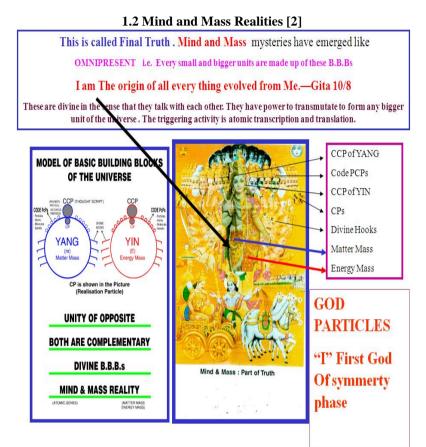

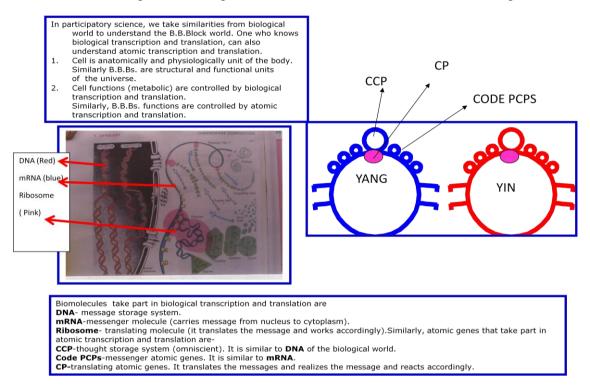

Fig. 1 Divine Mechanics Unit - CCP, CP and information s - Code PcPs with B-Bit - Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations . New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by "I" about 5000 years back to Arjuna in Mahabharata.as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties conscious ness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation . In all, it is automatic system of the universe . The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side). These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information's of the universe are stored as anti mind particles. It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes). That translates the messages and realizes it and reacts accordingly.[2]

1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

Fig. 2 Parallel teaching by participatory science

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons , primary fermions, primary bosons , Basic Building Blocks , Mind and Tachyons as shown in Fig 3

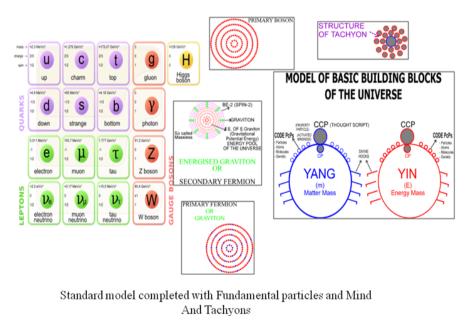

Fig. 3 standard Model chart [3]

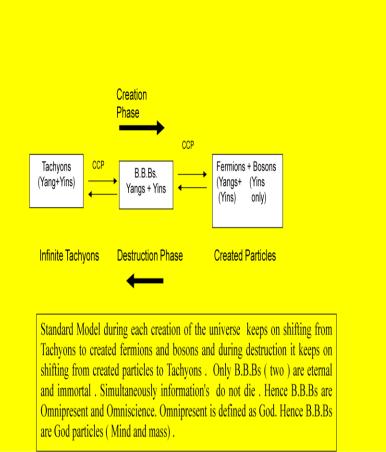

Fig .3.1 one creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1.Mass -The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.

2.Matter :-Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.

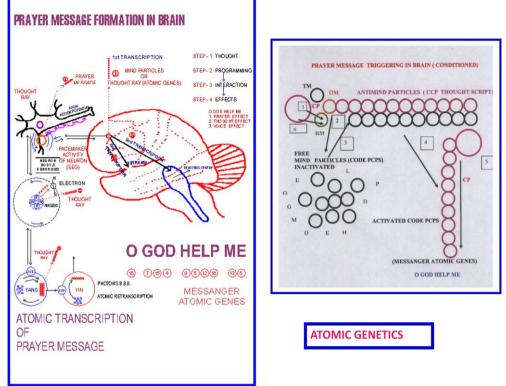

3.Inertial mass :-Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.

4. Gravitational mass :- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.

5. Pure m (matter) mass :-matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.

6. Energy mass:-Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc.) units.

7.m (impure matter) of $E=mC^2$:-Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain.

Fig 4 Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

- 1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
- 2. OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of "o god help me".
- 3. Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of "o god help me".
- 4. Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of "o god help me"
- 5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of " o god help me" is formed .
- 6. CP represses atomic transcription by adding RM (green) to OM (orange). Thus atomic transcription gets halt.

1.5 Having formed the message it comes out in three forms .

In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called THOUGHT RAY (Quantum entanglement) which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards REALIZING CENTER situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to

motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

1.7 Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). this shifting of thought expression is called atomic genetic engineering as shown in figure 4.1 the changed messages reach to target b.b.bs. through same route. having received the changed messages, target b.b.bs. stop expressing the previous programming and they start expressing the normal programming. as a result the cancer cells transmutate into normal cells. **Or diseased cell gets cured [6]** as shown in **Fig 4.1**

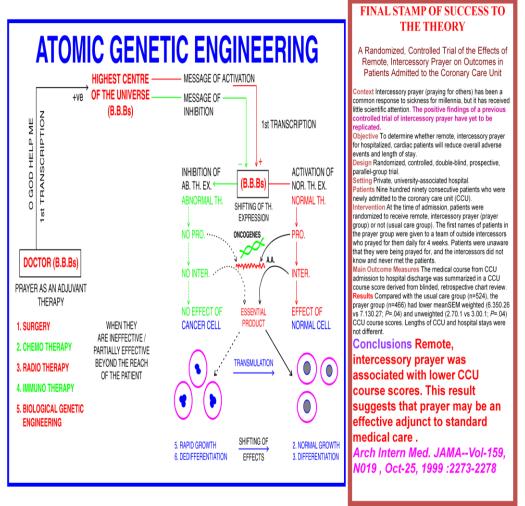

Fig. 4.1 A.G.E and Final stamp of success to New Theory[6]

1.8 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system. After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms ,molecules, cells, and even individuals talk with one another After the formation of the cell , nature created one more system called THIRD

TRANSCRIPTION .Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed.These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

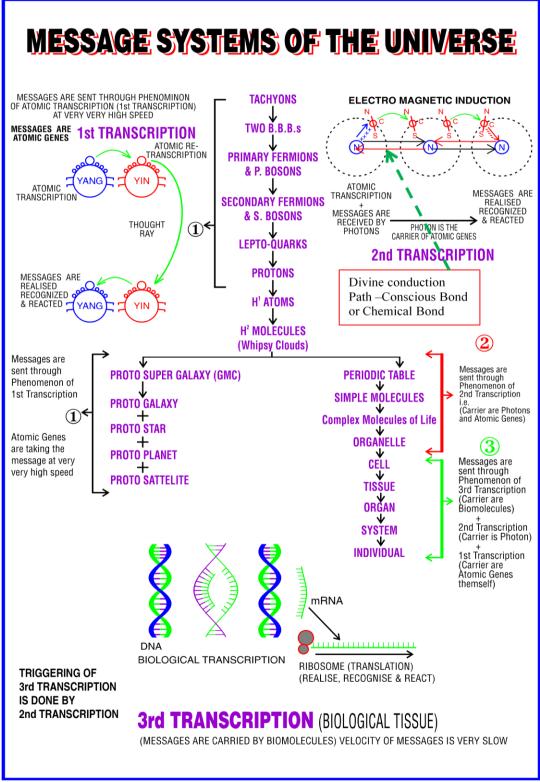

Fig. 5 Messages system of the universe

1.6 How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in fig 6 and fig 7. . there are two types of thought stimulation [2] . one is conditioned thought stimulation and other one is unconditioned thought stimulation.stimulation of thought expression --- there are two types of thought expressions one is conditioned stimulation of thought expression, and other one is self stimulation of thoughts i.e. unconditioned stimulation of thought expression, at the time of the origin of the universe, all effects got created, the cause of all effects of the universe is thought expression, these thought expressions were triggered by unconditioned or self stimulated way. it is the first step and it is followed by programming or formation of programmed messages by code pcps. this programmed message moves from higher centers to target b.b.bs. it is called interaction. having received the messages, the mind and mass of the target b.b.s. work in a synchronized way so as to produced the effects as thought by a the higher center. if the thought expression by higher center is normal, the shapes, properties and laws produced by target b.b.bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. this is the basic concept of transmutation phenomenon. finally what we observe is called effectappearance of new shapes. properties and laws is called transmutation. the first three steps are collectively called ccp. during transmutation process if ccp is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. transmutation phenomenon is seen in particles, atoms, molecules and even in cells, the basic steps of any transmutation remain the same except that the thought expressions differ, the subatomic particle are made up of more fundamental particles called basic building blocks (b.b.s) which are made up of mind and mass. these b.b.s are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). the triggering of broken symmetry is caused by atomic transcriptions. unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry . so the broken symmetry is never spontaneous. it is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned, hence the nobel prize physics 2008 awarded to this work is too early to give prize.

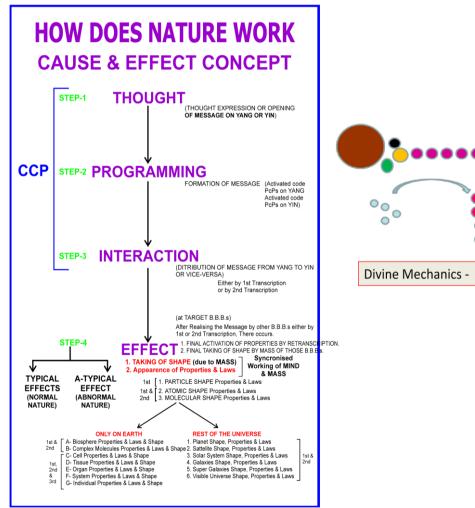

Fig. 6 Divine Mechanics – How Does Nature work ?

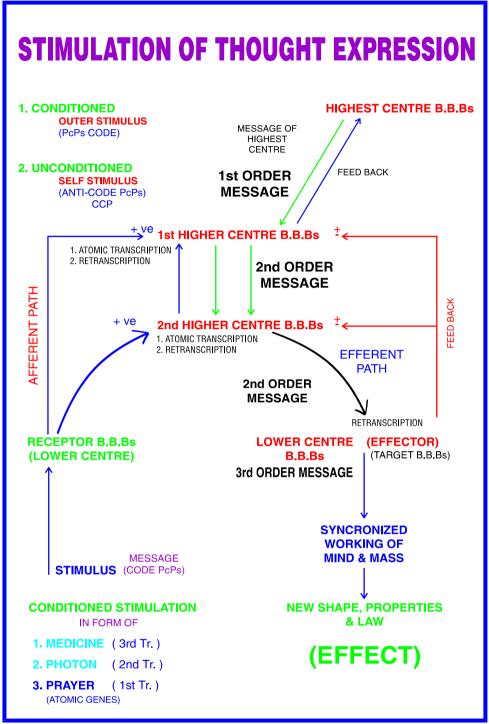

Fig. 7 Conditioned and Unconditioned thought expressions

1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units ,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons).Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units, nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers

and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher centers and from higher centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8

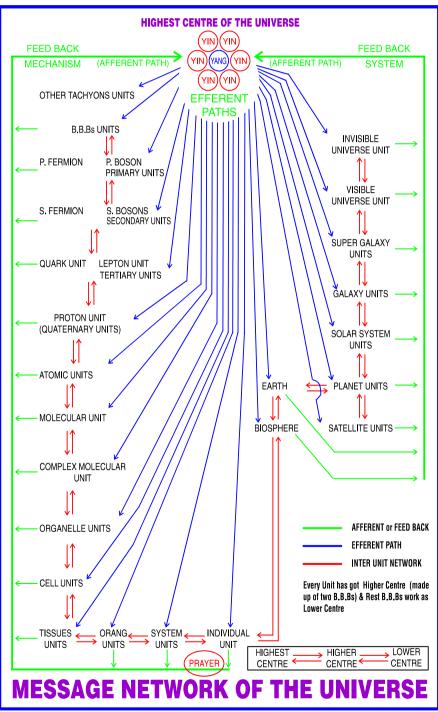

Fig. 8 Messages Net work of the Universe

1.8 Origin of the universe [7]

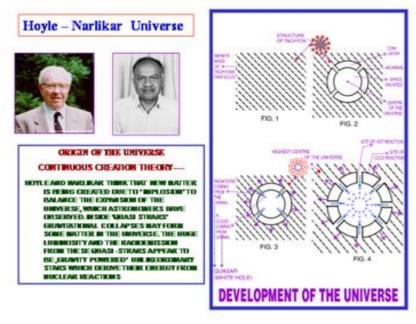

Fig. 9 Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in Fig-3 were in the form of tachyons as shown in Fig- 9 [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the highest center of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in Fig 3.1. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of COLD DARK MATTER (C.D.M) and canals in it. With the result space got created. At the other end of the canals, hot reaction started (the relics are back ground radiations 2.7 degree K of our hydrogen clouds). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus QUASARS appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in Fig 9. With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The HUBBLE LAW, can thus be explained. With some more passage of time, clouds were joined to form GMC (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated . I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe, it was mind reality that triggered symmetry breaking phase . It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle . There is nothing like artificial intelligence in the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe) . His mind could be manipulated by prayer only . as shown in figure 9.1 and 9.2

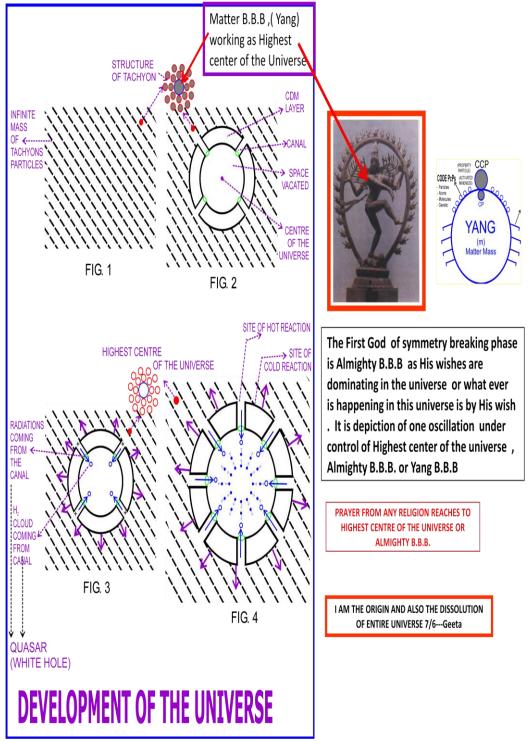

Figure 9.1 Hoyle Narlikar Universe OR Universe "I"

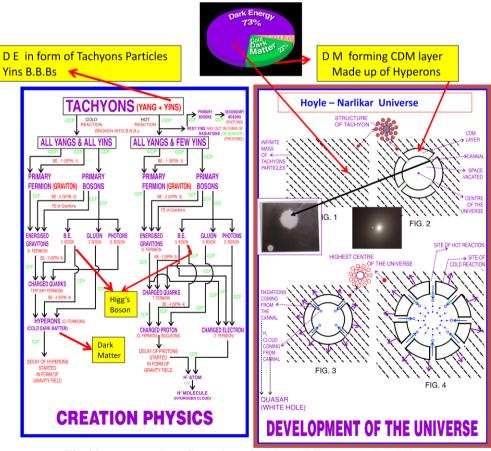

Fig 11 structural configuration of DM and DE at macro level [9]

1.10 Divine Mechanics and Brain Computation

Learning and Memory and information s (Code PcPs) Net work in Brain [10]

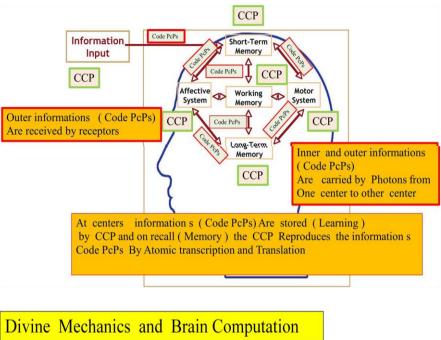

Fig 12 Divine Mechanics of Brain Computing System – Learning and memory

At all steps , these are B.B.Bs (B-Bit) that are responsible for information's control and triggering . If CCP is written it means unless atomic transcription and translation occur , brain cannot have learing and memory triggering and control and it is called Divine mechanics of Biology and it is life . These are higher thought expressions of B.B.Bs . In Bits of classical computers and qubits of QC , the thought expressions are lower and different but the mechanics (DIVINE) remains the same. as shown in Fig 12

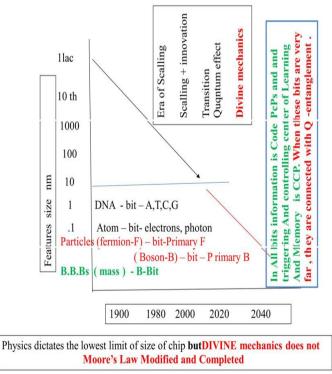

Fig 13- The Theory of Computers and Brain are same – DIVINE MECHANICS

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP , Code PcPs and CP.)DIVINE MECHANICS The Theory Of Computers And Brain Is SAME As Shown In Fig 13Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not . Hence the bit is a typical unit of information. ((Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system it is the different thoughts expressions that describe informations. Informations are separate (Code PcPs) and bits (Electron of transistor) oubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron, at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B- bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence information s are eternal . In computers, Bit is a structural configuration that describes information s of the system and information s are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different. But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal. In both the effect of describing informations would be different. One is classical (thought expressions are fixed and limited)and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results.). In life sciences in Brain the bit is again Photon and the information s are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS .

In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age /real age). It is Higher functions of B.B.B or B Bit and it is life . Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

II. Structure

2.1 Modification in concept of space - Riemannian Geometry and Euclidean Geometry: Looking at the new model of the universe Figure 9, we realize that we live in a closed sphere which is bounded by cold dark matter layer and it is expanding with velocity of light and thus more space is vacating. This gives simple picture of Euclidean geometry.

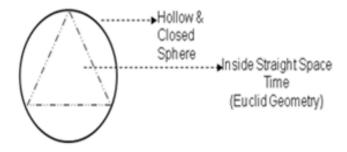

Figure 14 triangle inside hollow sphere, it will be always straight irrespective of the size of the sphere leading to straight space-time unrelated to gravity

The universe in which we live is basically *positive curvature* or sphere. If one draw's triangle inside hollow sphere, it will be always straight irrespective of the size of the sphere leading to straight space-time unrelated to gravity (Figure 14). The supporter of Riemannian geometry mapped it out on the surface of sphere leading to illusion (Figure 15). We are inside positive curvature or sphere and we are one of the *Participator* not the observer. If a line is drawn between two points inside sphere, it will be always straight. (Figure 16).

There are multiple models exist in geometry. Which geometry has to be applied on the universe, has to be chosen with full conscious or common sense. Common sense contradicts with concept of Riemannian universe in which closed universe is bounded by space-time i.e. *no boundary condition* or it does not have any matter boundary rather it is bounded by space-time and which is expanding more than velocity of light. The new model (Figure 9) has shown that our universe is bounded by *cold dark matter* layer, the boundary of the universe, and

which is expanding with velocity of light. So, no boundary condition is a hypothetical concept and it also contradicts my common sense. Unfortunately Einstein has chosen wrong geometry i.e. Riemannian geometry, which is not applicable on universe rather Euclidean geometry, a simple geometry is applicable on universe. Our universe is as simple as one's common sense and one does not need to make it complex by one's uncommon thoughts or unnatural thoughts.

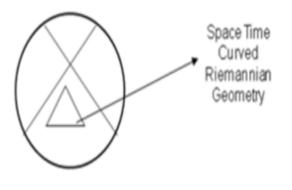

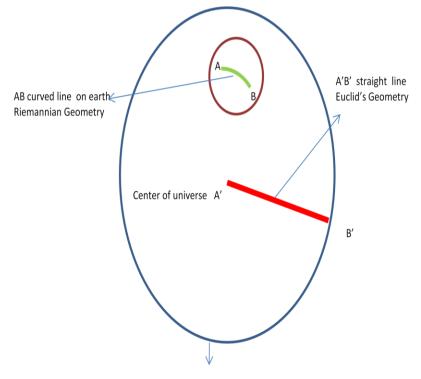

Figure 15 The supporter of Riemannian geometry mapped it out on the surface of sphere leading to illusion)

Expanding boundary of the universe

Fig 16. If a line is drawn between two points inside sphere, it will be always straight.

2.2 Modified Concept of Space: It is realized as an area without any mass or object, which has no property of bending or gravitation. It is simply a *void*.. Concept of time as well as its unification with the space shall be discussed separately.

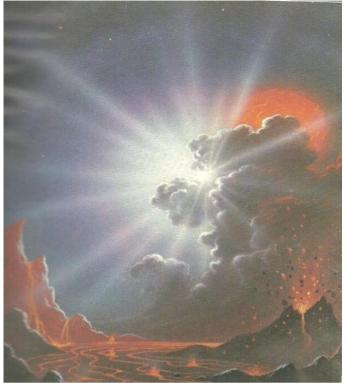

Figure 17 Straight sun light shafts- Gravity effect depends upon critical value of mass, Earth mass (m1) is less than critical value, Newton's law of gravitation does not work on earth for photon(m2)

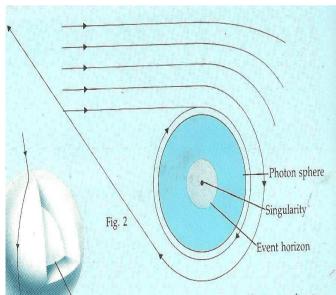

Figure 18 Photons obey Newton's Law of Gravitation F α M1.M2/d^2 Gravity effect depends upon critical value of distance which is different in a different frame of reference.

Having equipped with modified concept of space and gravitation, now we look forward as regard to *straightness* of *sun shafts*. Modern physicists believe that straightness of sun shafts is an illusion.

" If you look at sunlight shining through clouds, you can see great shafts of light coming through. You will notice that they are straight shafts of light coming through. You will notice that they are straight shafts, not curved in any way. But this straightness is an illusion. As we have seen, curves that are very gentle often seem to us to be straight lines. If this can seen on Earth it must of course, be even more marked when we consider distances in space because they are so much greater. Light beams will appear to travel straight in space and astronomers make all their measurements as if light does travel in straight lines. Yet if space is curved, the light beams must be curved as well."

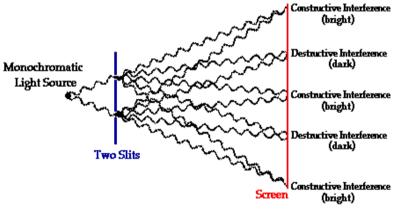

| Table 6 , New inference of Straight sun light Shafts | | | | | | | |
|---|--------------|--------|----------|--------|---|--|--|
| Experiment | Observations | | | | Inferences | | |
| Sun light coming through clouds. | Straight | Sun | Light | Shafts | 1. Newton's law of gravitation does | | |
| (Figure. 17) | coming the | hrougł | n clouds | | not work on photon on earth, | | |
| - | _ | - | | | F α M1.M2/d^2 | | |
| | | | | | because there has to be critical value of mass | | |
| | | | | | for gravitational force to work. Earth's mass | | |
| | | | | | is very less than (for photon only) that of | | |
| | | | | | critical mass. There fore earth is unable to | | |
| | | | | | apply force of attraction on photon. Hence, | | |
| | | | | | force of attraction is nil (for photon only). | | |
| | | | | | Since photon has property to propagate in | | |
| | | | | | straight line, there fore we observe straight | | |
| | | | | | sun light shafts and this straightness is Truth | | |
| | | | | | not illusion. | | |
| | | | | | 2. Gravity like other natural events | | |
| | | | | | also depends upon critical value of both mass | | |
| | | | | | and distance in a defined frame of reference. | | |

Table 6, New inference of Straight sun light Shafts

Photon does not obey Newton's law of gravitation on earth while it obeys the same law on sun. why it is so? It would be clarified during the discussion of *Genesis of Physical Laws* i.e. how laws of physics are formed and how do they work. It comes under teaching of *Atomic Genetics* i.e. the *Memory System* of the nature.

2.3Atomic genetics and interference phenomenon

Postulation: 10. Photon is neither wave nor electromagnetic in nature. They do not have dual nature. It is conscious particle and all effects are triggered by atomic genetics and all effects are due to synchronized working of mind and mass. \Postulation: 7. Visible universe is dynamic interplay of energy B.B.Bs. and matter B.B.Bs. They interact through their atomic genes or memory system or consciousness. B.B.Bs. obey the law of conservation of *energy* and *matter*. The energy B.B.B. obeys the laws of conservation of energy i.e. energy B.B.B. cannot be created or destroyed. Similarly, matter B.B.B. obeys the laws of conservation of matter i.e. matter cannot be created or destroyed. But being opposite in behavior (unity of opposite as their inherent properties or inertial properties are opposite i.e. one has inherent property of absolute rest and other one has inherent property of motion). They cannot be converted into energy B.B.B. Thus E=mC2 is a fictitious equation.

A two-point source interference pattern creates an alternating pattern of bright and dark lines when it is projected onto a screen.

Fig19 Wrong depiction of interference phenomenon

2.5 Two-Point Source Light Interference Patterns

Any type of wave, whether it be a water wave or a sound wave should produce a two-point source interference pattern if the two sources periodically disturb the medium at the same frequency. Such a pattern is always characterized by a pattern of alternating nodal and antinodal lines. Of course, the question should arise and indeed did arise in the early nineteenth century: Can light produce a two-point source interference pattern? If light is found to produce such a pattern, then it will provide more evidence in support of the wavelike nature of light.

Before we investigate the evidence in detail, let's discuss what one might observe if light were to undergo twopoint source interference. What would happen if a "crest" of one light wave interfered with a "crest" of a second light wave? And what would happen if a "trough" of one light wave interfered with a "trough" of a second light wave? And finally, what would happen if a "crest" of one light wave interfered with a "trough" of a second light wave? Whenever light constructively interferes (such as when a crest meeting a crest or a trough meeting a trough), the two waves act to reinforce one another and to produce a "super light wave." On the other hand, whenever light destructively interferes (such as when a crest meets a trough), the two waves act to destroy each other and produce no light wave. Thus, the two-point source interference pattern would still consist of an alternating pattern of antinodal lines and nodal lines. However for light waves, the antinodal lines are equivalent to bright lines and the nodal lines are equivalent to dark lines. If such an interference pattern could be created by two light sources and projected onto a screen, then there ought to be an alternating pattern of dark and bright bands on the screen. And since the central line in such a pattern is an antinodal line, the central band on the screen ought to be a bright band. as shown in Fig 19.

II. Right Explanation

According to Participatory science, as shown in Fig 20, let us know the structure of photon or energy quanta of monochromatic photons. Energy quanta of monochromatic photon is secondary boson and is made up of more fundamental particles called primary bosons which are also made up of more fundamental particles called energy Basic building blocks. Up on these B.B.B. atomic genes are found . Which is also called MIND particles as shown in Fig 20 When these monochromatic photons move in group, they form polychromatic light. Or white light. In white light these monochromatic photons to infra red monochromatic photons. To which participatory science calls tertiary bosons. Monochromatic photons (spherical particle with definitive mass,) propagate in space in wave pattern in straight line. It posses this pattern by virtue of the thought of that pattern as it has MIND also. Hence there is streams of monochromatic photons that follow wave pattern. This pattern is called transverse wave pattern.

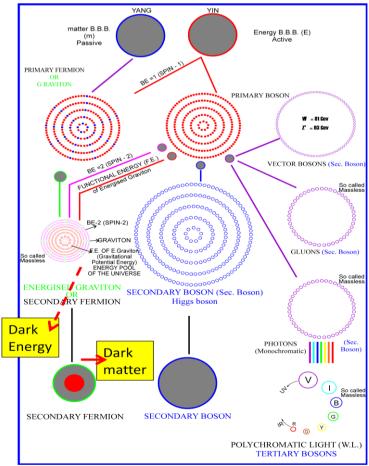

Fig 20 structure of monochromatic photons

During interference, as shown in Fig 21, there is redistribution of energy quanta OR monochromatic photons. This redistribution is being triggered by atomic transcription and translation of the interacting photons. It is due to conditioned stimulation of CCP of interacting monochromatic photons. If they (monochromatic photons of coherent rays) meet on the same phase, then, thoughts are expressed which make them to come together and there is amplitude modulation of super crest and super trough. This amplitude modulation takes place before the light falls on screen When light quanta or monochromatic photons meet on opposite phase, there is triggering of thought that make them to get apart from each other and they divert themselves to other directions and hence the path in front does not contain any more photons, hence it is shown as dark band on the screen. The diverted monochromatic photons again meet on same phase of other rays and there is thought expression which make them to come closure to make amplitude modulation leading to formation of bright bands next to dark band. Actually it is redistribution of monochromatic photons that are moving in wave pattern which is triggered by MIND rather than wave nature of light.

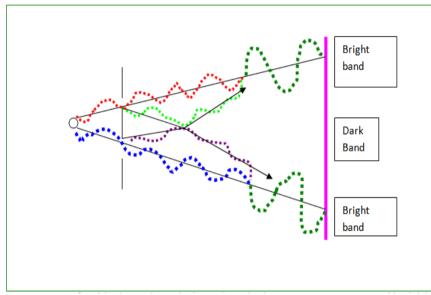

Fig 21 streams of particles (monochromatic photons) moving in transverse wave pattern making bright and dark bands

3.1 Conclusion of The Experiment.

Monochromatic photons of coherent source are divine units. They are not physical units. It means their working is triggered by atomic transcriptions or thought expressions. Phenomenon of interference has proved that monochromatic photons are not wave packet rather it is divine particle and due to its divinity it is moving in wave pattern. And the pattern is so fast that it looks as if it is wave packet (illusion) with definitive wavelength.

2.2 Law of Redistribution of Energy Quanta .

According to the law of conservation of energy - Energy particles cannot be created or destroyed. They can be transformed into other energy particles. Similarly energy quanta or monochromatic photons during destructive interference, they are not destroyed rather they are redistributed such that at constructive interference they get modulated (amplitude modulation) producing super crest and super trough making the bright band more bright. Hence during interference monochromatic photons are not destroyed rather they are redistributed. It could happen only because of triggering of thought of redistribution in side monochromatic photons.

The law of redistribution of monochromatic photons or energy particles is the basis of **divine** spectroscopy where we shall discuss about quantitative index, qualitative index and red and blue shift indices .

Modern physicists believe that energy quanta (hv) or monochromatic photon are WAVES. Participatory science has proved them divine particles with definitive mass and divinity is due to presence of atomic genes on basic building blocks (B.B.Bs.), the fundamental particles and divine activity or fundamental activity of the nature is atomic transcription or thought expressions.

3.3 Interaction of Photon (Boson) with energized Gravitons (Fermions)

As soon photon leaves the massive body (starlight,) or when it passes near massive body (quasar light), it interacts with many energized gravitons of massive body. If the concentration of gravitons per unit area is above critical value the effect is visualized and if it is below critical value the effect is not visualized. The property of energized graviton (yang part only) is, when it interacts with boson (yin) the resultant is attraction. The energy utilized in this effect is from energized gravitons. The amount of energy of photon is much higher than the energy involved in attraction or velocity is much higher than those of escape velocity of massive body. So, a type of dragging effect develops which causes. (Fig -22 and Figure 23)

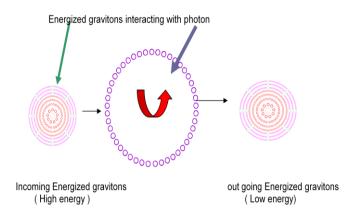

Figure 22 energized graviton interacting with photon of massive body

3.4Bending , 2. Slowing of velocity , 3. Gravitational red shift

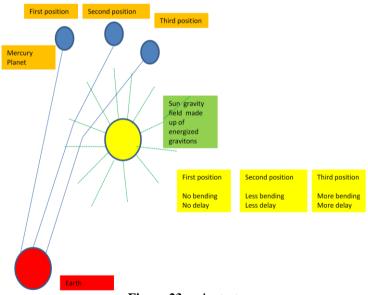

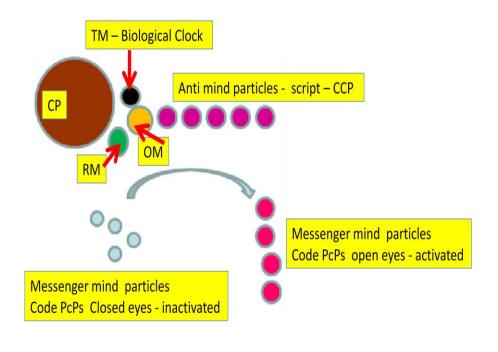

Figure 23 radar test

When the photon leaves effective area, the interaction stops and it moves straight and with its original velocity. Quanta of photon (amount of energy in one particle) does not reduce (Qualitative Index) but space between the two quanta increases (Quantitative Index). This reduced energy particle per unit length (Quantitative Index) causes red shift effect (wavelength of lower frequency) but spectral series (number and type - Qualitative Index) remain the same. Thus causing gravitational red shift. Quality of spectrum is unchanged but quantity of spectrum is lowered. The spectrum has got two indices one is qualitative index formed by quanta of each photon. While the shift is formed by number of photons per unit length calling quantitative index. If number of photons per unit length is increasing , it causes red shift in the spectrum. The energy is supplied by energized gravitons in work done. Each Photon's energy remains the same. The same principle is applied with Doppler's

red shift and blue shift. (Note: The detail mechanics will be given by participatory spectroscopy science after knowing atomic genetics). Mind of M1 (energized gravitons) triggers direction of bending, direction of retardation or direction of pull. While Mind of M2 (photon) triggers magnitude of bending, magnitude of retardation and magnitude of reduced energy per unit leangth. So basically it is the mind that designs all interactions of photon and energized gravitons out side earth. On earth sunlight shafts do not interact with energized gravitons of earth because, there is no triggering of mind either in M1 or in M2. It is not fed in precreation era by Highest center of the universe as earth mass is below a critical value. Hence sun light coming from clouds is straight shaft.

3.5Space Time and Gravity

Gravitational waves (ripples of space time) could not be placed in Standard Model Chart as they are Hypothetical (Fiction) Mathematical phenomenon told by Einstein while Energized Gravitons (particle theory) has been placed in SMC. Because before LIGO, spring balance has detected (Energised gravitons /unit area) on earth. Hence they are particles that mediate gravity (force). LIGO detected Energised gravitons / unit area of distant celestial bodies

| pression or Divine Mechanic | cs - | |
|-----------------------------|------|--|
|-----------------------------|------|--|

Fig 24 TM is a atomic gene and it is part of CCP or thought script

Time is consciousness (Time mindness or Atomic genes) present in CCP (Fig 24) (thought script of Anti mind particles) While Space is Void which is Nothing. How could space create ripples? A fake Mathematical Theory of Space Time Unification or Fourth dimension. They cannot Unify. Space ends with end of universe but Time (phycological arrow of Time - thought expressions) would persist. Hence Nobel prize physiology 2017 (Circadian gene expression calling it biological clock) and Nobel prize physics 2017 (on ripples of space time calling them gravitational waves detected by LIGO) are Hoax. TM is present in CCP, a property of thought process. It is real biological clock and it designs step by step all effects of the universe by Time cycle triggered at the origin of the universe and it will end with the end of universe. Stepping of thought expression is triggered by TM (real Biological Clock). While numerical mindness (magnitude of cycle - repetition) is a numerical thought expression, which is also triggered and controlled by TM.

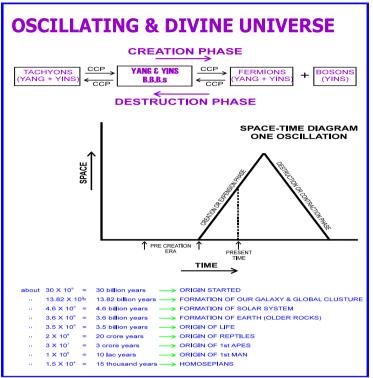

Fig 25 - Arrows of time, cosmological as well as thermodynamics are triggered by TM (real Biological Clock)

Cosmological arrow of time , thermodynamics arrow of time are triggered and controlled by TM . Our physiological arrow of time is also triggered and controlled by TM . Circadian Rhythm city is also triggered and controlled by TM (outer TM - conditioned stimulation of thought or inner TM- unconditioned stimulation of thoughts). It is wrong to say circadian gene expression (macro level) is biological clock . Rather circadian gene expression is also under pined by circadian thought expressions which is triggered by outer stimuli or Outer TM .

 $2.5 \ \ Triggering of phenomenon of \ \ distortion of \ \ distances \ \ of \ Laser \ photons \ \ of \ A \ and \ B \ \ (micro \ and \ macro \ level) by atomic \ transcription \ and \ \ translation \ \ or \ thought \ expression \ .$

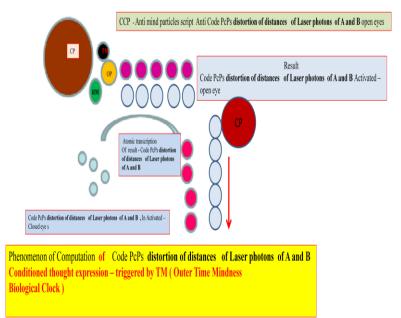

Fig 26 Phenomenon of computation of thought expression of phenomenon of distortion of distances of Laser photons of A and B (micro level)

In atomic transcription and translation of distortion of distances of Laser photons of A and B , following steps take place on Yin B.B.B – B-Bit (higher center in photons)

TM triggers (Biological Clock) the distortion of distances of Laser photons of A and B (conditioned) thought expression

There is phenomenon of **Memory search** (of the result as it is there in memory after learning) by CP. Having searched the result, there is phenomenon of **memory expression** of the result by CP.

- 1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription of result is triggered .
- 2. .OM triggers activation of free mind particles (blue -inactivated code PCPs) of that thought script (magenta) of "Code PcPs distortion of distances of Laser photons of A and B ".
- 3. Free mind particles (blue **-inactivated Code PcPs** distortion of distances of Laser photons of A and B) get attached to anti mind particles script (magenta one) to form messenger thought script of **"Code PcPs** distortion of distances of Laser photons of A and B ".
- 4. Messenger atomic genes (blue) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (sky blue open eye) of "**Code PcPs** distortion of distances of Laser photons of A and B
- 5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of "**Code PcPs** distortion of distances of Laser photons of A and B " is formed .
- 6. CP represses atomic transcription by adding RM (green) to OM (orange). Thus atomic transcription gets halt.

\Phenomenon of computation of thought expression of phenomenon of distortion of distances of Laser photons of A and B (micro level) separately

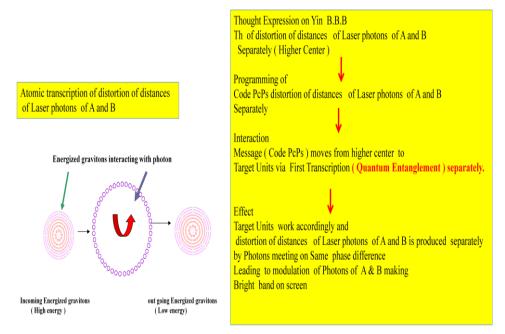

Fig 27 Phenomenon of computation of thought expression of phenomenon of distortion of distances of Laser photons of A and B (micro level) separately

Phenomenon of distortion of distances of Laser photons of A and B (macro level)

When energized gravitons (density above critical value) released from celestial objects come and interact with laser photons of LIGO, following thoughts of distortion of distances are expressed in laser photons A and B separately (higher centers). The messages come out as code PcPs distortion of distances of Laser photons of A and B separately. The messages spread (First transcription or Quantum entanglement) to target B.B.Bs of laser photons A and B separately. Having received the messages of distortion of distances of Laser photons of A and B separately, the effect of distortion of distances is produced in LIGO and a phase difference change is produced during interference in interferometer between two laser photons beams A and B

by mind making brightness on screen (Blue). Effect is designed by mind rather than interference is desynchronized due to altered phase difference caused by space time ripples. It is an effect that leads to modulations, If they (monochromatic photons of coherent rays) meet on the same phase, then, thoughts are expressed which make them to come together and there is amplitude modulation of energy quanta leading to appearance of bright band or photons meeting on same phase difference leading to formation of super crest and super trough. Previously it was synchronized (Yellow). Effect is designed by mind rather than due to synchronized phase difference. It is an effect that leads to redistribution of photons (photons meeting on Opposite phase difference). There is triggering of thought that make them to get apart from each other and they divert themselves to other directions and the path in front does not contain any more photons, hence it is shown as dark band on the screen. or laser photons of A and B beams diverting making darkness on screen . .. Time is plotted on the X-axis and strain on the Y-axis. Strain represents the fractional amount by which distances are distorted by mind (Fig 28) The energy for work done is supplied by energized gravitons. Direction of distortion of distances is decided by mind of M1 (energized gravitons - higher centers) while magnitude of distortion of distances of laser photons is decided by mind of M2 (Laser Photons higher center). There are many thoughts that are expressed to design the effects. There is feed back to higher centers before next thought is expressed. The entire phenomenon is triggered and controlled by TM (outer TM - Energized

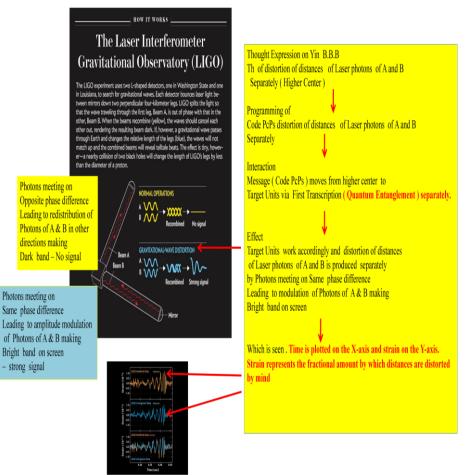

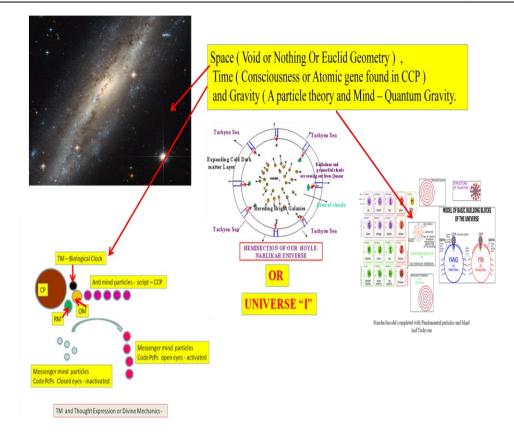

Fig 28 Phenomenon of distortion of distances of Laser photons of A and B leads to formation of brightness on screen (macro level – blue one) produced during interaction with energized gravitons of distant celestial bodies by MIND.

III. Conclusion

Space, Time and Gravity are wrongly unified by Einstein in mathematical theory of Space –Time continuum or fourth dimension making it general theory of relativity making it main pillar of Big Bang theory of Origin of the universe. Which is a myth. In reality Space means Void or Nothing, Time is Consciousness or Atomic gene found in CCP and Gravity is A particle theory with mind in a new model of universe called Hoyle Narlikar universe or Universe "I".

Graviton 's TM)
