|                                                                                                                                                                                |       |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Algebraic Equivalence Of Cramer’S Rule And The Gauss–Jordan Method For Linear Systems                                                                                          | 01-06 |
| A Hybrid CNN–LSTM Framework For Multimodal Non-Invasive Diabetes Risk And Hospital Readmission Prediction                                                                      | 07-18 |
| Ethical Hacking As Strategic Cyber Defense In India: Comparative Performance Analysis Of Penetration Testing Tools For Cyber Resilience And Critical Infrastructure Protection | 19-36 |
| A Hybrid Machine Learning Approach For Personalized Engineering College Recommendations                                                                                        | 37-40 |
| Cybersecurity and Data Privacy in the Internet of Things (IoT): Risks, Challenges, and Mitigation Strategies                                                                   | 41-50 |
| Machine Learning Framework for Predicting Students’ Academic Placement in Areas of Study in Senior Secondary Schools in Abakaliki                                              | 51-54 |
| Development of a Web-Based Early Warning and Prediction System for Lassa Fever Outbreaks in Ebonyi State, Nigeria                                                              | 55-59 |
| Zero Trust Security for Multi-Cloud Systems: Challenges, Frameworks, and Future Directions                                                                                     | 60-69 |
| Evaluation of Machine Learning Models for Real-Time Fault Detection in Industrial Production Lines                                                                             | 70-77 |
